GAME BASICS

GETTING STARTED

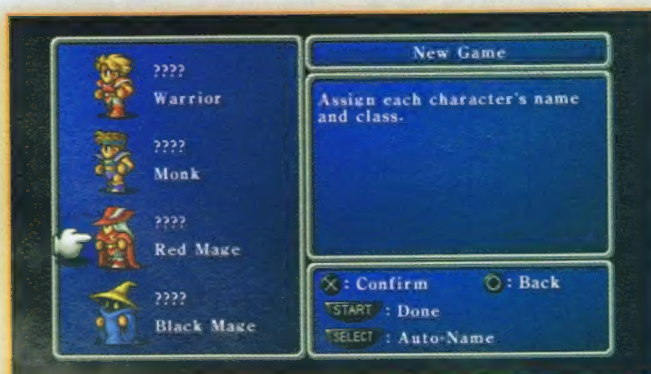

Welcome to the beginning, not only of this guide, but to the *FINAL FANTASY* series. The graphics have been enhanced from their previous 8-bit incarnation and an impressive CG intro has been added. If you played *FINAL FANTASY* when it originally appeared on the NES, then you're already familiar with the game's mechanics. If you're a fan of the series and never played the original, then take a moment to browse the game manual for the basics of getting a game up and running.

The latest incarnation *FINAL FANTASY* includes a modified version of the original adventure (one big change is the ability to save almost anywhere and at almost any time), the bonus dungeons from *Dawn of Souls*, and a completely new dungeon called the Labyrinth of Time.

Picking the Right Party

At the beginning of the game, you must choose a class for each of your four characters. With six classes and four characters, this is a difficult decision. A good rule of thumb for a balanced party is to use two offensive characters (Warriors, Thieves, or Monks) and two spellcasters (Black Mages, White Mages, or Red Mages). To learn more about each character class, flip ahead to the "Character Classes" section.

The Controls

Main Menu

Pressing the Triangle button while not engaged in battle brings up the main menu. This screen provides a quick overview of every character's current status, your current location, and progress through the game.

In addition, there are seven options that allow you to use Items or Magic, change a character's equipment, get an in-depth view of a character's status, change the party's formation, alter the configuration of the game settings, or save the game.

Soft Reset

Pressing START + SELECT + L + R takes you back to the opening game screen for *FINAL FANTASY*.

Items

Use this menu to manage the items in your inventory. The name of each item is listed, followed by the quantity of that particular item in your inventory. Your inventory can hold up to 99 of a single item.

The Key Items selection lists special items collected throughout your adventure. The items displayed here have specific uses that are triggered by events in the game.

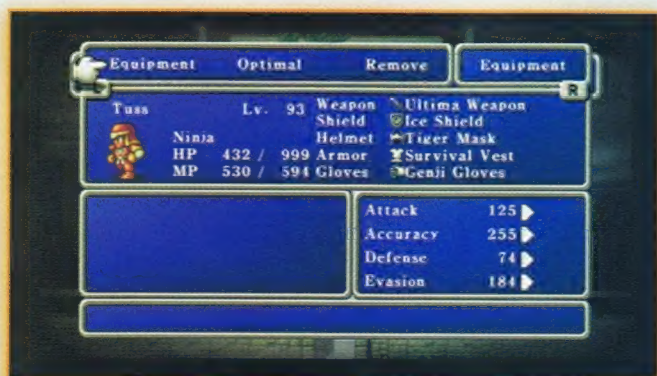

Magic

Select a character to view a list of that character's current spells. This screen enables you to use certain spells (those highlighted in white text), or discard a spell that you want to replace with another.

Equipment

A character's Equipment menu enables you to equip weapons, shields, helmets, armor and gloves. The four values on the bottom-right side of the screen change based on the item being equipped (some of the items obtained from the bonus dungeons impact other numbers not seen on this screen). Yellow numbers indicate an improvement, while gray numbers indicate a decline in those four stats.

Select Optimal to automatically equip the items with the best stats. Select Remove, then choose a piece of equipment to return that piece of equipment to the party's inventory. Don't leave this screen too quickly! Keep in mind that the Optimize option does not take into account any enemies that you may encounter. A Mythril Sword has a lower Attack rating than a Flame Sword, but you don't want to equip a Flame Sword if you're about to face a Red Dragon.

Status

The Status screen shows each ability rating for a particular character, as well as that character's current EXP and the amount of EXP needed to level up. Before venturing into a new area, check each character's Status screen to see if anyone is about to level up.

Formation

This option allows you to select two characters and switch their places in the party's marching order.

Configuration

The Configuration menu allows you to change the gameplay settings. Highlight a selection to display information about that option on the bottom of the screen.

Dash

On Always dash while moving.

Off Dash only when dash button is pressed.

This is only effective in towns and dungeons. It has no real impact on gameplay other than speeding through these areas.

Cursor

Default Keep default cursor position in menus.

Memory Remember cursor position in menus.

If you repeat the same commands and use the same items continuously, the Memory option reduces the tedium of selecting the same options on every turn.

Message Speed

The closer to 'Fast' this option is set, the quicker messages will scroll during the game.

Controls

This menu enables you to change the Confirm/Back button, Menu button, Bestiary button and how you control your party's movement.

Window Color

Use this option to change the Red, Green and Blue settings of the menu windows.

Bestiary

Each enemy you fight and the number defeated is listed here. There is a completion percentage (which comes into play as one of the game's secrets) included on the main screen.

Select an enemy to view additional information about it.

Terrain and Travel

Plains

Forest

Desert

Stone

Mountains

Shallow Water

Deep Water

Modes of Transportation

WALKING: The party can walk over Plains, Forest, Desert, and Stone areas.

SHIP: The Ship is used to travel over deep water, but is limited to docking at a harbor until the party gains the use of the Canoe. With the Canoe, the Ship can dock at rivers.

CANOE: The Canoe is used to cross the shallow water of rivers and lakes.

AIRSHIP: The Airship flies over every type of terrain, but can only land on open plains.

BASICS OF BATTLE

While exploring dungeons and castles or traveling from town to town, your party will randomly encounter groups of enemies. In addition, there are pre-arranged battles against bosses that are triggered by speaking with certain NPCs, or by stepping on a certain point.

Between Battles

When you're not actively engaged in a battle, you can prepare each character—or your entire party—to improve their chances for survival and success. Each town or monster-infested area may contain better equipment than what your party currently uses. When you acquire something new (by purchasing it, looting it from a chest, or if it's dropped by an enemy), compare it against your characters' current equipment. Items that can't be equipped (Antidotes, Potions, etc.) generally serve as back-ups for White Magic spells that your party may not have. These items, which are used to restore HP or remove status ailments, are consumed after a single use. You cannot consume Key Items; these items are necessary to trigger certain events and advance the game's storyline.

You must purchase Black and White Magic from the appropriate magic shops, which are always located inside a town. Generally, Black Magic is used to inflict damage and status ailments, while White Magic is used to restore HP and remove status ailments. Not all characters can use magic, but it's extremely important to keep spell lists full for the ones who can.

Use the Formation command in the main menu to change the order of your characters (the character in the top position appears on the screen while you're navigating). Characters closer to the top position are more likely to get hit, so place the characters with the highest hit points accordingly.

During Battle

Unlike the later games in the FINAL FANTASY series, *FINAL FANTASY* has a fairly simple battle system. Your characters have six choices from which to select one action per round of battle. Those options are:

1. Attack a single enemy with that character's equipped weapon.
2. Use Magic to heal allies' HP, remove status effects, or inflict damage on enemies.
3. Defend in an attempt to reduce damage taken from enemy attacks.
4. Use Items from your party's inventory, or one that the character has equipped.
5. Equip an item from your party's inventory to use in battle (the character can perform another action this turn).
6. Attempt to Flee the battle.

After Battle

After a successful battle, the surviving members of your party (those who aren't KO'd or afflicted with Stone) divvy up the EXP and collect all the gil and items (if there are any) left behind.

EXP is used to raise each character's level. The higher a character's level, the more powerful he or she is in combat and—if they can cast spells—the more MP he or she will have to use on magic.

There are several methods to use to restore the entire group's HP and MP. Sleeping Bags and Tents restore some HP to each party member and can be used anywhere on the World Map. Cottages are the same, but they restore more HP and all MP to each character. Staying at an Inn restores each character's full HP and MP.

STATUS CONDITIONS AND THEIR CURES

Many magical status effects raise and lower stats, like Haste and Slow. There are seven status conditions with special effects that are important to know. These conditions can affect both allies and enemies.

POISON

The character takes damage each turn of battle and for each step taken between battles.

Use the spell *Poisona* or the item *Antidote* to remove this ailment. Note that this condition persists after a battle ends if it isn't removed.

PARALYSIS

The character cannot move or act.

This ailment may go away on any turn, but always vanishes when a battle ends.

SLEEP

The character cannot move or act.

This ailment may go away on any turn, but always disappears when a battle ends.

DARKNESS

The character's accuracy and evade scores drop.

Use *Blindna* to remove this ailment. If nothing is done during battle, the condition always goes away when the battle ends.

SILENCE

The character cannot cast spells.

Use the spell *Vox* to cure this ailment. If nothing is done during battle, the condition always goes away when the battle ends.

STONE

The character cannot act.

Use the spell *Stona* or the item *Gold Needle* to remove this ailment. Note that this condition persists after a battle ends if it isn't removed.

KO

When a character's HP reach 0, the character cannot move or act.

To revive a KO'd character, use the *Life* or *Full-Life* spells, a *Phoenix Down*, or visit a *Sanctuary* and make the requested donation.

ONE MORE CONDITION...

There is one more status condition: *Confusion*. Caused by the spell of the same name, this condition only affects enemies. When affected, the enemies turn the other direction. A confused enemy will attack its comrades or itself at random.

THE MAGIC SYSTEM

Magic is divided into two categories (Black and White) and ranked from level 1 to 8. Although there are four Black Magic spells and four White Magic spells in each level, each character can only learn three spells per level. If you would like to learn a spell but have already filled the three slots allowed, you may use the Discard option in the Magic menu to drop a spell and free up a spot. You can fill Red Mages' slots with any combination of White and Black Magic spells, provided they can learn those spells. Knights have a limited selection of White Magic, while Ninjas face the same situation with Black Magic.

It takes MP to cast spells and all spell levels use the same pool of MP. Each class that can cast spells gains MP with each level increase, but the amount gained is random. For this reason, if you have a Warrior or Thief in your group, it's a good idea to complete the class change as early as possible to maximize the amount of MP the Knights and Ninja can accrue.

White Magic

Level 1

Blink

MP Cost	Class	Cost	Location
3		50	CORNELIA

Comments: Raises caster's evasion.

Cost/Sell 160 gil/80 gil

Kikuichimonji

ATK	ACC	Class	Description
+35	+25		A chrysanthemum adorns its scabbard. (+5 Strength)

Dropped Kraken, Rubicante

Sell 100 gil

Dark Claymore

ATK	ACC	Class	Description
+40	+5		A sword with a shimmering black blade.

Dropped Mythril Golem

Sell 100 gil

Braveheart

ATK	ACC	Class	Description
+30	+52		A sword that casts Confuse when used.

Dropped Barbariccia, Yamatano Orochi

Sell 100 gil

Enhancer

ATK	ACC	Class	Description
+28	+25		An unusual rapier infused with magic. (+7 Intelligence)

Dropped Duel Knight

Sell 100 gil

Ultima Weapon

ATK	ACC	Class	Description
+100	+100		A sword bound to its wielder's HP.

Chest Whisperwind Cove B40

Sell 100 gil

CHARACTER CLASSES

UNDERSTANDING ABILITY SCORES

Each character has seven ability scores and four combat parameters. The ability scores are part of each character and increase as a character levels up. The combat parameters add the effects of ability scores with the effects of equipment.

Gaining Levels

Because there is some randomness to the statistical HP and MP increases due to gaining levels, it's worthwhile to save just before a character gains a level. That way, if a character ends up with small increases, it's easy to use a load of reborn, reload the last save and regain the level.

	Garrik	
	Lv. 7	Red Mage
	HP 90 / 90	
	MP 53 / 53	
	Mid	
	Lv. 1	Red Mage
	HP 67 / 67	
	MP 44 / 44	
	Yara	
	Lv. 1	Red Mage
	HP 107 / 107	
	MP 48 / 48	
	Kery	
	Lv. 7	Red Mage
	HP 85 / 85	
	MP 52 / 52	

This is also why it's also a good idea to have characters level up at different times to avoid a situation where one character levels up with good numbers while another character levels up with poor numbers. Unfortunately, the only ways to prevent characters from gaining EXP is to have them end a fight either KO'd or with the Stone slaw effect.

Ability Scores

Garrik		Red Wizard		Status	
L		Lv. 44		R	
	1 HP	277 / 474		4 Strength	12
	2 MP	447 / 467		5 Agility	12
	3 Magic Level	7		6 Intelligence	18
	Current EXP	289227		7 Stamina	10
	Next Level	8687		8 Luck	12
Weapon	Sun Blade		Attack	43	
Shield	Buckler		Accuracy	193	
Helmet	Ribbon		Defense	30	
Armor	Ruby Armet		Evasion	84	
Gloves	Protect Ring				

1 HP (Hit Points)

The amount of damage the character can sustain before being KO'd. The number on the left is current HP, while the number on the right is the character's maximum HP.

2 MP (Magic Points)

The amount of magic a character can use. The number on the left is current MP, while the number on the right is the character's maximum MP.

3 Magic Level

The highest level of magic available to the character.

4 Strength

Strength, added to an equipped weapon's strength, determines the amount of damage the character causes with an attack.

5 Agility

Agility raises the Evasion parameter. Higher Agility scores mean it is more likely that the character will act earlier in battle, making it easier to flee from combat.

6 Intelligence

Intelligence determines the odds of success on hit-or-miss spells like Sleep and Bind, and the amount of damage from attack spells or recovery from healing spells.

7 Stamina

Stamina is used to determine a character's HP growth between levels. A higher Stamina number leads to a higher Max HP.

8 Luck

This stat determines the odds of scoring a Critical Hit (when an attack inflicts double the damage). Also, like Agility, it makes it easier to escape from battle and for the party to get a pre-emptive strike.

Combat Parameters

The last five scores (HP and MP don't affect the parameters) combined with the effects of equipment determine the character's four combat parameters:

Attack

This score is equal to the equipped weapon's power plus half the character's strength.

Accuracy

This number determines the accuracy and number of attacks that are attempted. For each multiple of 32 in this score, the character gets an additional attack. Keep this in mind when deciding whether to equip an accurate weapon or a powerful one. If the accurate one pushes this score over a multiple of 32, it's the right choice.

Defense

When an enemy attack connects, a character's defense determines how much of the enemy's attack gets through and how much is blocked by equipped armor. Equipped armor includes shields, helms, armor and gloves.

Evasion

Evasion is based on Agility but it is lowered based on the equipped armor. Whereas a higher defense lowers damage caused from being hit, a higher Evasion lowers the chance of the attack connecting.

Equipment Carryover

When determining which equipment a class can use, remember that even after a character changes classes, they can still use the equipment from the previous class. For example, if you equip White Mages with Ruby Armlets, they can still use it as White Wizards.

Defense vs. Evade

Heavy armor raises Defense but lowers Evasion. This means that heavily armored Warriors are hit more often, but receive less damage. Monks tend to have high Evasion scores, but take major damage with each hit.

Gaining Levels

The following table indicates the number of EXP required to level up a character. The center column shows the total EXP gained, while the last column illustrates the EXP necessary to increase to the next level.

For all levels beyond level 47, the number of EXP required to reach the next level is 21,750 except for the rare instances in which it's 21,748 or 21,749.

Magic Levels

This table explains the minimum level a character must achieve before he or she can employ spells from a given level of magic. For example, Black Mages gain the ability to use level 4 magic at level 13, while Red Mages must wait until level 15.

WARRIOR

The game's most basic character may be its best. Warriors have access to the best weapons and armor, which leads to high Attack and Defense parameters on top of their already impressive Strength and Stamina. They have the most HP of any character class.

Starting Stats

Strength	10
Agility	8
Intelligence	1
Stamina	15
Luck	8
HP	35
MP	0

Equipment Usable by Warrior

ARMOR	Clothes, Leather Armor, Chain Mail, Iron Armor, Knight's Armor, Mythril Mail, Flame Mail, Ice Armor, Copper Armlet, Silver Armlet, Ruby Armlet, Diamond Armlet
SHIELD	Leather Shield, Iron Shield, Buckler, Mythril Shield, Flame Shield, Ice Shield, Aegis Shield, Protect Cloak
HELMET	Leather Cap, Helm, Great Helm, Mythril Helm, Ribbon
GLOVES	Leather Gloves, Bronze Gloves, Steel Gloves, Mythril Gloves, Giant's Gloves, Protect Ring

Weapons Usable by Warrior

AXE	Battle Axe, Great Axe, Light Axe, Mythril Axe
HAMMER	Hammer, Mythril Hammer
STAFF	Staff, Power Staff, Crosier
KNIFE	Knife, Dagger, Mythril Knife
SWORD	Rapier, Scimitar, Saber, Falchion, Broadsword, Rune Blade, Werebane, Coral Sword, Wyrmlkiller, Long Sword, Claymore, Mythril Sword, Flame Sword, Ice Brand, Sunblade, Masamune

KNIGHT

Knights have all of the strengths of the Warrior, plus the ability to cast White Magic spells up to level 3.

Equipment Usable by Knight

ARMOR	Diamond Armor, Dragon Mail
SHIELD	Diamond Shield
HELMET	Healing Helm, Diamond Helm
GLOVES	Diamond Gloves, Gauntlets, Giant's Gloves

Weapons Usable by Knight

HAMMER	Thor's Hammer
KNIFE	Cat Claws
SWORD	Venom Blade, Vorpai Sword, Defender, Excalibur

White Magic Usable by Knight

LEVEL 1	LEVEL 2	LEVEL 3
Cure	NulShock	NulBlaze
Protect	Invis	Cura
Blink	Blindna	
	Silence	

THIEF

The Thief is more fragile than the Warrior and causes far less damage. What you get in return is Agility and Luck; these two things make it easy to escape battles and occasionally allows your party to attack first. The Thief can only wear light armor and has a limited selection of weapons.

Starting Stats

Strength	5
Agility	15
Intelligence	1
Stamina	5
Luck	15
HP	30
MP	0

Equipment Usable by Thief

ARMOR	Clothes, Leather Armor, Copper Armlet, Silver Armlet, Ruby Armlet, Diamond Armlet

HELMET	Leather Cap
GLOVES	Leather Gloves, Protect Ring

Weapons Usable by Thief

KNIFE	Knife, Dagger, Mythril Knife
SWORD	Rapier, Scimitar, Saber, Falchion, Rune Blade, Coral Sword, Wyrmlkiller, Masamune

NINJA

The Thief does get a bigger boost from the Class Change than any other character, but it's still not up to a Knight's standards. Ninjas use Black Magic spells up to level 4, including the all-important Haste. They also have access to a wider variety of weapons and armors than the Thief.

Equipment Usable by Ninja

ARMOR	Chain Mail, Iron Armor, Mythril Mail, Flame Mail, Ice Armor
SHIELD	Leather Shield, Iron Shield, Mythril Shield, Flame Shield, Ice Shield, Protect Cloak
HELMET	Helm, Great Helm, Mythril Helm, Healing Helm

Black Magic Usable by Ninja

LEVEL 1	LEVEL 2	LEVEL 3	LEVEL 4
Fire	Blizzard	Fira	Sleepra
Sleep	Dark	Hold	Haste
Focus	Temper	Thundara	Confuse
Thunder	Slow	Focara	Blizzara

MONK

Monks break all the rules. They have better Defense and Evasion without armor, and get twice as many attacks when fighting bare-handed (they use both hands when striking). Since Monks shouldn't equip armor or weapons (especially after level 10 or so, when their bare-handed attacks get good), they're relatively cheap to maintain. At around level 15 or so, they pass up the Warrior in terms of total damage dealt. The downside is their weak Defense (until late in the game when they can wear armor that won't significantly impact their Evasion); they get sufficient HP, but can still get KO'd by a single hit from a boss or strong foe.

Starting Stats

Weapons Usable by Monk

NUNCHAKU	Nunchaku, Iron Nunchaku
STAFF	Staff, Power Staff, Crosier
SWORD	Masamune

MASTER

What does the Monk get from a class change? A shiny new sprite. Same Monk, but new packaging!

RED MAGE

The Red Mage can learn White and Black Magic spells up to level 5, although some spells are prohibited. The Red Mage is by far the best fighter of the spell-casters, and is capable of using a wide variety of weapons and armor. The Red Mage is a good alternative to the Black Mage.

Starting Stats	
Strength	5
Agility	10
Intelligence	10

Objectives

1

Visit the king of Cornelia.

7

Battle the Piscodemons inside the Marsh Cave for the Crown.

2

Battle Garland in the Chaos Shrine.

8

Return the Crown to the king of Western Keep.

3

Receive the Lute from Princess Sarah.

9

Return the Crystal Eye to Matoya.

4

Travel north to visit Matoya's Cave

10

Revive the Prince and get the Mystic Key.

5

Journey east to Pravoka and battle pirates.

11

Retrieve the Nitro Powder and other treasures.

6

Talk to the Elf Prince's Healer in Elfheim.

12

Travel to Mt. Duergar and give the Nitro Powder to Nerrick.

SHOPPING RECOMMENDATIONS

Equipment and Items

You start with enough gil to outfit everyone with equipment and pick up three or four spells. There's not much to say about weapons and armor: get everyone the best stuff possible. If you want to save some gil, then skip the Monk's items since he fares much better with no weapons or armor at all.

Spells

Spells are a bit trickier. The first one to purchase is Cure, which should keep you safe while fighting nearby foes for EXP and gil. Black and Red Mages should get Fire so they have a source of damage (early in the game, more enemies are vulnerable to Fire than Thunder) and the Sleep spell to deal with large groups of foes. If you have extra gil before facing the Chaos Shrine, then pick up Dia to help deal with the Undead creatures. When you have enough gil for a third spell for Black and White Mages, opt for Thunder and Protect, respectively.

Cornelia Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Black Widow	28	10	0	28	—	8	30
Crazy Horse	64	10	2	40	—	15	63
Gigas Worm	56	17	8	40	Fire	15	63
Goblin	8	4	4	16	—	6	6
Goblin Guard	16	8	6	23	—	18	18
Skeleton	10	10	0	17	Fire, Dia	3	9
Wolf	20	8	0	28	—	6	24

The enemies near Cornelia are somewhat weak. Even a White or Black Mage can dispose of a Goblin in one hit, but Goblin Guards may require the attention of Warriors. It will require multiple hits to deplete a Wolf's 24 HP, but this foe isn't much of a threat. The most dangerous foe in this area is the rare Crazy Horse. With 64 HP and an attack score of 10, these foes can take out a level 1 character in one hit. Since you never know where they will appear, keep your HP near max at all times. You can always run away, but stay and fight whenever possible, as a fallen Crazy Horse gives up 63 EXP.

An Audience With the King

The party materializes outside of Cornelia bare-handed, unarmored, and with no spells or items. Fortunately, Cornelia has everything an adventurer needs, as well as a lead on the first quest. Walk into any of the red buildings to the south of the castle to enter the city.

Talk to one of the guards at the exits to go to the castle. The king needs help rescuing Princess Sarah, who has been kidnapped by the knight Garland and taken to the Chaos Shrine in the northwest.

Locked Doors

A few locations, such as Castle Cornelia, have doors that require a special key to unlock. The items behind these locked doors appear on the maps, but you can't collect these goodies until later in the adventure.

Leveling Up Before the Chaos Shrine

As it stands, the Chaos Shrine is probably a bit beyond the party's capabilities at level 1. To make things easier on your troops, battle monsters around town to build up EXP and save gil, then return to Cornelia to buy the items and equipment you couldn't afford earlier

and get the party back to full HP and MP at the Inn. Once everyone in the party is at level 3, they should be powerful enough to handle Garland.

Earthgift Shrine

The path to the Chaos Shrine runs near the entrance to the Earthgift Shrine, one of the bonus dungeons added to *Final Fantasy*. There is more information about the bonus dungeons included later in this guide. For now, just note its location for a future visit.

CHAOS SHRINE

Chaos Shrine Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Black Widow	28	10	0	28	—	8	30
Ghoul	48	8	6	36	Fire, Dia	50	93
Gigas Worm	56	17	8	40	Fire	15	63
Goblin	8	4	4	16	—	6	6
Goblin Guard	16	8	6	23	—	18	18
Skeleton	10	10	0	17	Fire, Dia	3	9
Warg Wolf	72	14	0	46	—	22	93
Werewolf	68	14	6	45	—	67	135
Wolf	20	8	0	28	—	6	24
Zombie	20	10	0	25	Fire, Dia	12	24

While in the area outside of the Chaos Shrine, you will encounter enemies from around Cornelia in larger quantities and even run into some Shrine foes. Black Widows can inflict as much damage as Crazy Horses, but it's possible to defeat them with a concentrated attack. Skeletons often go down in one hit, but Dia helps against large groups of them. Gigas Worms are dangerous; try to knock them out with Sleep, then cast Fire spells to exploit their elemental weakness.

Enemies like Gigas Worms and Black Widows are more common inside the Chaos Shrine. In addition, some new Undead enemies join the Skeletons: Ghouls and Zombies! Mages begin to pay off in this area, as Gigas Worms are vulnerable to Fire and all Undead creatures are vulnerable to both Fire and Dia.

Other new foes include Werewolves and Warg Wolves. Both foes are dangerous, so if you catch one amongst a large group of Wolves or Goblins, try to put it to sleep and have the party target it with their standard attacks. If you don't have Sleep, it may be wise to run away.

Raiding the Chaos Shrine

It's quite possible to get in and out of this dungeon with ease if you know where to go. There are treasure rooms in all four corners, but the northeast and southeast treasure rooms are both locked. That leaves only the northwest room (which contains a **Potion** and a **Tent**) and the southwest room (which contains a **Leather Cap**). Give the Leather Cap to your weakest mage for a small defensive boost.

If you don't care about loot and are ready to face Garland, then the end of this dungeon is only a few steps away. Walk straight into the room to the north of the entrance.

Items Found
Leather Cap
Potion
Tent

GARLAND

Garland has 212 HP and has high magic defense, so rely on physical attacks to cause damage. Have your designated healer (a White or Red Mage) use Cure to heal whomever Garland attacks while everyone else attacks on each turn. Have your Black Mages use Fire and Thunder for a little extra damage.

Rewards Await at Cornelia Castle

After Garland falls, talk to Princess Sarah to return to the castle. As a reward, the king orders the bridge to the north to be rebuilt, opening up the next area of the quest. Talk to Princess Sarah again before leaving, as she too has a reward. Her Lute is the game's first Key Item, but it won't come into play for quite some time.

Encounters North of the Bridge

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Crazy Horse	64	10	2	40	—	15	63
Gigas Worm	56	17	8	40	Fire	15	63
Goblin Guard	16	8	6	23	—	18	18
Lizard	92	18	12	55	—	50	153
Ogre	100	18	10	65	—	195	195
Scorpion	84	22	10	55	—	70	225
Tarantula	64	5	12	46	—	50	141
Warg Wolf	72	14	0	46	—	22	93
Werewolf	68	14	6	45	—	67	135

The more difficult Chaos Shrine enemies (like Gigas Worms, Werewolves, and Warg Wolves) guard the path to Matoya's Cave and Pravoka. They are joined by new foes like the Ogre, a giant beast with 100 HP and no weakness to magic. Battling a single Ogre is almost like fighting Garland again, but it's worth the trouble: you will earn 195 EXP and 195 gil for defeating an Ogre. Lizards are nearly as tough but much less lucrative.

The empty area to the south of Pravoka is home to a new foe called the Scorpion. These hard-hitting foes can inflict poison on your party members. At this point in the game, the only way to cure poison is to use an expensive Antidote.

MATOYA'S CAVE

Items Found

Potion (x2)

Antidote

After crossing the bridge, there is a decision to make: head north to Matoya's Cave, or head east to Pravoka. Matoya's Cave is purely optional for now, but the detour is a good source of EXP and you can raid her home for two Potions and an Antidote. If you decide to pay Matoya a visit, revisit Cornelia afterwards for healing (unless you picked up a Sleeping Bag), as the Ogres that guard her cave are fierce!

The Road to Pravoka

The road to Pravoka is much longer and the encounters will likely be quite grueling. To get there, head due east and then go south when you spot the sea.

World Map

The World Map shows the player's current location on a map of the game world. It includes a compass rose and a list of nearby locations.

SHOPPING RECOMMENDATIONS

Equipment and Items

If you're low on gil, pick up a Scimitar for your Thief since it's the most cost-effective weapon. Also, get Broadswords for your Warriors and Red Mages (if you can afford it). The Broadsword's accuracy makes it a better choice than the Battle Axe. Although the Leather Shield is fairly cheap, most everything else is overpriced. If possible, try to purchase Leather Gloves for anyone who needs a defensive boost.

Spells

None of the White Magic spells are essential yet. Blindna and Silence aren't terribly important, and while you should pick up NulShock soon, it doesn't really become a factor in the game until much later. That said, Invis is quite possibly the best choice for now.

In fact, it's wise to spend your gil on Black Magic spells. Blizzard is a strong elemental attack. In a game where few bosses are vulnerable to magic, attack-boosting Temper is the best utility spell early in the game. If you want to fill the third slot, Slow is a decent choice but not nearly as good as Sleep.

Take Down the Pirates

Go to the Inn and do your shopping as soon as you arrive. You should be at full strength when you talk to Captain Bikke in the northwest corner of the town, as a battle soon follows.

Setting Sail for Elfheim

Steer to the west and set sail for Elfheim. The ship battles are tough, so visit the Inn before the next leg of the journey. If you don't have the Black Magic spell Thunder, buy it now because it's effective against enemies in the sea. From the port south of Cornelia, head due south. When you hit land, locate the port just to the west. It's a short walk from there to Elfheim.

PIRATES

Although the Pirates all look intimidating, they each only have 24 HP. A successful Sleep spell is essential in this battle, or you can slash and stab the foes. After the battle, the defeated Captain Bikke hands over the deed to his **Ship**, located at the dock just south of town.

Ship Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Bigeyes	10	4	0	14	Lightning	10	42
Buccaneer	50	14	6	37	—	120	60
Sahagin	28	10	4	28	Lightning	30	30
Sahagin Chief	64	15	8	46	Lightning	105	105
Shark	120	22	0	70	Lightning	66	267

There are only a handful of enemies who are capable of attacking the ship, but these battles may be difficult for low-level parties. Even though Buccaneers are much more robust than their Pirate cousins, they won't stand a chance against a sturdy party. Sahagins, the most common foes, occasionally team up with the rarer Sahagin Chiefs. All Sahagins are vulnerable to Lightning, so use Thunder to take out the red Chiefs.

Perhaps the most dangerous enemies are Sharks, which combine a high attack score with a meaty 120 HP. These foes are also vulnerable to Thunder spells, so use a Black Mage to your advantage. If you encounter a Shark and a Bigeyes, eliminate the Bigeyes first. These enemies can paralyze characters one by one, thus setting the stage for a Shark to shred its victims.

SHOPPING RECOMMENDATIONS

Equipment and Items

So much to buy, so little gil... If you don't have an overabundance of gil, you may want to wait until after the party explores the next dungeon. While in this dungeon, you can acquire lots of gil and acquire Iron Armor, a Copper Armlet, and a Dagger. It may be wise to save your gil and attempt to acquire these items from the dungeon. Consider purchasing a Saber for your Thief, but don't buy anything if you have a Monk. He's capable of inflicting more damage with his bare hands and probably already has better defensive stats without armor.

For characters other than a Monk, buy headgear and consider purchasing a Copper Armlet for your mage in most need. These pricey items count as body armor and serve as the only alternative to the Clothes that your mages currently wear.

Spells

Spells provide the most benefit in the upcoming challenges, so devote most of your budget to beefing up your mages. Get Thundara or Fira for your Black or Red Mage for a good group attack spell. For the third slot, consider Hold over Focara although this spell is hardly a must-have. Purchase Cura, Diara, and NulBlaze for White Mages, but not all at once (NulBlaze can certainly wait).

When a character is capable of using level 4 spells, get Haste. Blizzara and Confuse are effective Black Magic spells, too. The White Magic at this level is a bit weak. Poisona will save gil in the long run, while Fear is a secondary option when things go horribly wrong. NulFrost is the least useful of the elemental defense spells, while Vox isn't called on often.

Elfheim Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Cobra	56	6	6	46	—	50	123
Ghast	56	8	10	40	Fire, Dia	117	117
Gigas Worm	56	17	8	40	Fire	15	63
Goblin Guard	16	8	6	23	—	18	18
Ogre	100	18	10	65	—	195	195
Ogre Chief	132	23	14	71	—	300	282
Tarantula	64	5	12	46	—	50	141
Warg Wolf	72	14	0	46	—	22	93
Werewolf	68	14	6	45	—	67	135
Wolf	20	8	0	28	—	6	24

Some new foes appear alongside the usual assortment of overworld foes in the Elfheim/Marsh Cave area. You may see Ogres fighting alongside Ogre Chiefs, although the green Chiefs are only marginally more difficult.

Status conditions are often more of a threat than physical damage, so beware of Undead-class Ghasts who can paralyze their victims. Cobras and Tarantulas are also dangerous, as each of their hits can poison its target. These two have basically the same stats with weak attack and defense and 56 and 64 HP respectively. Nevertheless, it's important to eliminate them right away and always carry several Antidotes until you learn the White Magic spell Poisonsa.

The Town of Elfheim

Like Cornelia, Elfheim consists of a town and a castle. There's no way to reach the castle from town, so you must enter it from the world map. At the castle, it's revealed that the king of the Dark Elves, Astos, has cursed the prince. Maroya may have the cure, but she won't provide any help until someone returns her Crystal Eye.

Back in town, someone mentions a spooky castle that was discovered in the northwest. A visit to the Western Keep isn't necessary, but it will shed some light on the situation. If you had planned to fight some enemies to build levels, you may as well head in that direction. Before doing so, pick up a few Tents at the item shop. The tents cost only 60 gil more than a stay at the Inn, plus there's no need to take the long trip back to Elfheim to use them.

WESTERN KEEP

There is a king in the Western Keep who offers to help, if someone can help find his crown. It is believed that the crown is somewhere in the Marsh Cave, directly south of the Western Keep.

Marsh Cave Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Anaconda	80	22	10	56	—	50	165
Black Widow	28	10	0	28	—	8	30
Bloodbones	144	26	12	76	Fire, Dia	378	378
Crawler	84	1	8	51	—	200	186
Gargoyle	80	12	8	53	—	80	132
Ghoul	48	8	6	36	Fire, Dia	50	93
Gray Ooze	76	30	7	55	Lightning	70	255
Green Slime	24	1	255	36	Ice, Fire	20	84
Scorpion	84	22	10	55	—	70	225
Skeleton	10	10	0	17	Fire, Dia	3	9
Shadow	50	10	0	37	Fire, Dia	45	90
Tarantula	64	5	12	46	—	50	141
Warg Wolf	72	14	0	46	—	22	93
Werewolf	68	14	6	45	—	67	135
Zombie	20	10	0	25	Fire, Dia	12	25

A wide variety of monsters lurk in the Marsh Cave, but many of them also appeared in the Chaos Shrine. The more mundane newcomers include the Shadow, a feeble Undead-class enemy that can cast Dark on your characters. Gargoyles have 80 HP, but possess little strength outside of fighting in large numbers. Anacondas are incapable of inflicting poison, but their bites cause solid damage.

More interesting foes include the Green Slime, a poisonous blob with incredibly high physical defense. The only practical way to damage it is to use Fire or Blizzard spells. If your party lacks an appropriately equipped Black or Red Mage, then it's best to flee from these foes. The Gray Ooze resembles the Green Slime, but it behaves quite differently. Although the Green Slime can only deal damage with Poison, the Gray Ooze has a high attack rating. Note, however, that the Gray Ooze has low defense and is vulnerable to Thunder spells.

Crawlers have a low attack rating (1), so they use their turns to paralyze party members. Skeletons and Bloodbones occasionally accompany Crawlers into battle, so remember to cast Dia or Fira before the Crawler can paralyze your spellcaster.

Welcome to the Marsh Cave

The three-level Marsh Cave is much more difficult than the Chaos Shrine, so low-level parties may want to make several short forays. Grab some treasure, escape from the area, and use Tents (or return to Elfheim) to heal. It's quite possible for a high-level party to get through the Marsh Cave in a single trip. A powerful party may want to consider skipping the north side of B2 to save time.

Duplicate Chests

Marsh Cave, B1 and B2 North

After dropping into the pit, you can go either north or south. The north path leads to a small chunk of B2 that contains three rooms and four treasure chests (680 gil, a Dagger, a Broadsword, and 620 gil). The chests that contain the 680 gil and the Broadsword are concealed within duplicate chests that can be found elsewhere.

Marsh Cave, B2 South

To advance in this area, go south from the entrance. The staircase leads to a room in a different section of B2, where there are three treasure rooms to the south (they contain the duplicate chests with 680 gil and the Broadsword). To reach the third floor, go south from the room with the staircase, then east along the bottom wall. Walk through the first door, then exit the next one. The staircase to B3 is to the southeast.

Marsh Cave, B3

This spacious cavern consists of 16 rooms, many of which are empty. You need the Mystic Key to open the bottom four rooms, so stick to the top three rows for now. There is a **Phoenix Down** on the west side of the top row and 295 gil on the east side. The next row down holds the **Copper Armlet**, plus a **Cottage**, and there's a duplicate **Phoenix Down** chest in the same room. On the third row, the third and fourth chests contain 385 gil and another duplicate **Phoenix Down** chest. It's best to save the party's strength for the second room—where the Crown awaits—along with an encounter point.

Copper Armlet obtained from the chest!

PISCODEMON

The encounter point is the square directly in front of the chest. Each time the party steps on it, they will encounter up to four Piscodemons. Despite their appearance, Piscodemons can't cast spells but they can inflict serious damage. They have no weaknesses to exploit, so hit them with everything to cut through their 84 HP.

Return to Matoya's Cave

From Elfheim, sail north toward Cornelia and slide the ship underneath the bridge that the king ordered reconstructed. Find a port in the small inlet; from there, it's just a short walk north to Matoya's Cave. Matoya trades the Jolt Tonic that the Elf Prince needs for the Crystal Eye.

Revive the Elf Prince

Return to Elfheim and give the Prince his medicine. In return, he provides the Mystic Key, the master key that unlocks all of the locked doors in Cornelia Castle, the Chaos Shrine, Elfheim Castle, Western Keep, and the Marsh Cave! The only item you need to progress further is inside Cornelia Castle, but the rest of the loot is pretty good. Time to do some backtracking!

Treasures in Elfheim Castle

To access this castle's stash, take a step through the small door in the southeast and loop around to the treasure room in the northeast. Don't go

more than one space away from the wall, or else the party will be returned to the world map. The treasures include the **Mythril Hammer** (great for White Mages), **Bronze Gloves**, and a total of 1500 gil.

Encounters in Western Keep

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Mummy	80	30	20	60	Fire, Dia	300	300
Wraith	86	22	4	52	Fire, Dia	231	231

Wraiths are specters that can cause paralysis with each hit, while Mummies can put their prey to sleep with their attacks. As is the case with all Undead foes, use *Diara* and *Fira* spells against them.

Treasures in Western Keep

The treasure room is southwest of the throne room. There are three chests inside, each of which is protected by an encounter spot. Several Wraiths guard the center chest, while numerous Mummies protect the other chests. The loot includes a **Power Staff**, a **Falchion** (a great sword for Thieves and Red Mages), and **Steel Gloves**. If you want to avoid fights, open the chests from either side without crossing the space directly in front of each chest.

Treasures in the Marsh Cave

Are the chests behind the four locked doors on B3 worth the trouble? Perhaps the best treasure is a **Silver Armlet**, which is available in the next town for 4000 gil. The other chests contain an **Antidote** and **1020 gil**. If you want these items, return to the third floor and explore the rooms along the south wall.

The room in the southwest corner contains the Silver Armlet, which is guarded by a pack of Piscodemons. The chest with the Antidote is guarded by Anacondas. The gil in the southeast room is protected by Piscodemons, as well.

Treasures in Cornelia Castle

The six chests in Cornelia are completely unguarded! Loop around to the back of the castle to find two treasure rooms with three chests each. One room contains a suit of **Iron Armor**, a **Tent**, and the Key Item **Nitro Powder**. The other room contains a **Cottage**, a **Saber**, and a **Mythril Knife**.

Treasures in the Temple of Chaos

The Temple contains some nice treasures, and they're easy to get now that your party is much stronger. There are some Gargoyles in the northeast corner near the door guarding a **Werebuster** and a **Gold Needle**. The southeast chest, which contains the **Rune Blade**, is guarded by an identical encounter point.

Rune Blade vs. Werebuster

The Rune Blade is a powerful weapon that can be used by any party member. It is a Key Item and is required to progress the story. The Werebuster is a powerful weapon that can be used by any party member. It is a Key Item and is required to progress the story.

MT. DUERGAR

Items Found

Cottage
Great Helm
Ether
Potion
Mythril Mail
Tent
Wyrmslayer

Raiding Dwarven Treasure

Travel along Cornelia's coast to the northwest to find a small port just past the mountain range south of the Chaos Shrine. Hike southwest along the coast to a ring of mountains with a cave entrance. Inside is Mt. Duergar, the Dwarven homeland mentioned by the Elves.

There are two chests inside the room to the far north of the entrance. These chests contain 575 gil and 450 gil. In the huge room at the south end of the cave, locked with the Mystic Key, are eight chests with great loot: a **Tent**, **Great Helm**, **Wyrmslayer**, **Ether**, **Potion**, **Mythril Mail**, 575 gil, and a **Cottage**. The Wyrmslayer is slightly better than the Werebuster and Rune Blade. This weapon causes extra damage to dangerous Dragon-type enemies, so give it to a Thief or Red Mage.

Blasting a Dwarven Canal

The Dwarves have a great deal of information. Smyth the blacksmith offers to forge a weapon out of Adamantite, if you should find some. Repay the Dwarves' hospitality by giving the Nitro Powder to Nerrick, the Dwarf, at the entrance of the far south tunnel. He uses it to blow up the land bridge south of the Mt. Duergar, creating a canal big enough for the ship to pass through. Now you can visit the towns and caves on the outer edge of the continent.

Head to the Cavern of Earth.
- 

Battle the Vampire for the Star Ruby.
- 

Give the Star Ruby to the guardian of the Giant's Cave.
- 

Get the Earth Rod from the Sage.
- 

Return to the Cavern of Earth and use the Earth Rod.
- 

Defeat Lich, the Fiend of Earth.

SHOPPING RECOMMENDATIONS

Equipment and Items

If you opened all of the chests with the Mystic Key, then the party should have better equipment than most of the items sold here. Aside from the expensive Knight's Armor, there is the Silver Armlet. This item represents a significant armor upgrade for spellcasters.

Spells

Purchase Life for White Mages as soon as possible. Curaga and Diaga nicely round out the level 5 slot, but those spells can wait for now. Pick up Firaga for Black Mages. Scourge is a bit of a gamble, but it will occasionally wipe out a field full of powerful enemies.

This is where the Red Mage's lack of specialization begins to hurt: Curaga is the only White Magic available (until the Class Changes) and Black Magic choices are similarly limited.

Melmond Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Cobra	56	6	6	46	—	50	123
Gigas Worm	56	17	8	40	Fire	15	63

Warg Wolf	72	14	0	46	—	22	93
Wolf	20	8	0	28	—	6	24

The only new foes in the Melmond area are Hyenadons and Lesser Tigers. Both foes attack in large packs and are quite a bit tougher than the Wolf-type foes encountered up to this point in the game. Take them out one by one using physical attacks, followed up by low-level spells like Sleep. Try to save your good spells for the Cavern of Earth.

Towards the Cavern of Earth

Melmond's port is west of the canal the Dwarves made and the town is only a few steps east of the port. A ravaged community, filled with tales of Vampires and giants in the nearby caves, greets the party inside. The grueling Cavern of Earth is the next stop, so buy a few key supplies before proceeding.

Walk west and slightly south from Melmond to reach a thin strip of land that connects to a triangular island with two large mountain ranges. The mouth of the Cavern of Earth rests between the mountain ranges.

The Amazing Dr. Unne

There is a scholar in the northeast corner of town named Dr. Unne. He doesn't offer anything (save proof of his large ego) at this point, but he plays a key role later in the adventure...

Ogre Mage	144	23	10	80	-	723	723
Piscodemon	84	30	16	98	-	300	276
Sphinx	228	23	12	115	-	1160	1160
Tarantula	64	5	12	46	-	50	141
Troll	184	24	12	100	Fire	621	621
Warg Wolf	72	14	0	46	-	22	93
Werewolf	68	14	6	45	-	67	135
Wight	52	20	12	45	Fire, Dia	150	150
Wraith	86	22	4	52	Fire, Dia	231	231

Monsters in the Cavern of Earth are strong and hardy. Only a few foes have special attacks or magical weaknesses, so this dungeon tests endurance more than wits. The Hill Gigas, for example, has 240 HP and an attack power of 38, while Minotaurs are only slightly weaker with 164 HP and an attack power of 22. The Earth Elemental has 288 HP and a stunning attack power of 66; fortunately, it does have a weakness to Fire, as do Trolls.

It's often the weaker foes who are the most dangerous. Cockatrices only have 50 HP and an attack power of 1, but they can turn characters to stone with their glance. If you don't have a Gold Needle to reverse this status effect, you can run back to Elfheim to buy one, or hope they drop after fighting Cockatrices (which is risky). A new undead foe, the Wight, can paralyze your party. On occasion, the sleep-inducing Mummies will join the Wights.

Former encounter point favorites like the Piscodemon and Gargoyle are abundant here, as are old friends like the Lizard, Tarantula, and Ogre Chief.

There are a few new enemies in the lower levels of the Cavern of Earth. Although the Sphinx have 228 HP, their low attack power ensures that the battles are more time-consuming than dangerous. Take the extra time to defeat them, since you'll earn up to 1160 EXP a pop!

Ogre Mages have access to a few spells, like Sleep and Blizzara, but they normally use their turns to cast weaker spells like Blink. The Ochre Jelly foes have fairly high attack power scores, but they are vulnerable to physical attacks and some spells (Fire- and Ice-type magic). They rarely appear, so if your goal is to fill up the Bestiary, be prepared to search for a while.

- Mythril Shield
- Staff
- Star Ruby

Cavern of Earth, B1

There are six different directions to choose from the start of B1, but only the east route leads to the B2 staircase. The south route leads nowhere, while the west and southwest routes lead to a dangerous loop. It's important to note that the west wall is comprised entirely of encounter points! If you decide to travel around the loop, you will frequently encounter Hill Gigas and Lizard foes. This is a great way to obtain EXP, but it's even a better way to get killed.

The north route leads to a room with a chest that contains 1975 gil. It's guarded on the right side by an encounter point with a deadly Earth Elemental. The southeast route forks and each path leads to a treasure room with two chests and an encounter point. The treasures are 880 gil, a Potion, an Antidote, and 795 gil.

Cavern of Earth, B2

There are two treasure rooms on this floor. To reach the first one, head southeast around the pile of boulders and then head east. This treasure room contains a Coral Sword, a Tent, and 330 gil. The Coral Sword causes extra damage to aquatic enemies and may come in handy later. To access the other treasure room, go south from the boulders, move east at the east-west fork, and south again. The three chests here contain a total of 5575 gil and a Leather Shield. There is an Earth Elemental encounter spot near the door. To reach the staircase from the second treasure room, loop around the wall to the northeast.

Cavern of Earth, B3

Your destination is just a few steps to the north of where the party enters this floor. Unfortunately, there's a wall in the way so travel east, north, west, south and east again. This essentially makes the party travel in a giant loop around the entire floor.

There are a few treasure rooms along the way. The room at the end of the east passage contains a Sleeping Bag. In the east end of the north passage, after fighting past an Earth Elemental encounter point, there is a Gold Needle. A door to the north in the middle of the west passage contains another Earth Elemental encounter point and a worthy reward of 3400 gil. The last treasure room is toward the end of the south passage, as you turn back to the east. This one contains 1020 gil and one last Earth Elemental encounter point.

VAMPIRE

The room at the end of the passage (just north of the B2 staircase) contains a **Star Ruby**. However, you must defeat a Vampire to reach it. The Vampire's attack power is a brutal 76, but this boss only has 156 HP. Because the Vampire is weak to Fire and Dia spells, use them to quickly turn the fight in your favor.

HP	ATK	DEF	MDEF

Path Blocked

Collect the Star Ruby from the chest. Further progress is blocked by a stone slab. Walk back out and return to Melmond to heal your party.

GIANT'S CAVE

Items Found

Mythril Helm

Great Axe

Pay the Toll to Pass

The next destination is Giant's Cave, which is west of the cape that leads to the Cavern of Earth. Giant's Cave is guarded by...well...a giant! Talk to the giant to give him the Star Ruby and he will allow the party to pass. Before continuing to the staircase on the other side, turn to the south and raid this cave's treasure room for a Mythril Helm, 1070 gil, and a Great Axe.

THE SAGE'S CAVE

Items Found

Earth Rod

The staircase on the other side of the Giant's Cave leads past the mountain range at the western tip of the Melmond area, just north of the Sage's Cave. Travel down to meet the Sage and he will reward the party with the **Earth Rod**. This Key Item will allow the party to move the stone slab and gain entrance to the lower two floors of the **Cavern of Earth**.

Cavern of Earth, B4

Ogres, Hyenadons, and a few Sphinx foes. A second treasure room is in the southwest corner of this floor. It contains **1250 gil**, a **Tent**, and a **Mythril Shield**, all guarded by more Ogre/Hyenadon encounter points.

Use the **Earth Rod** at the stone slab just past the encounter with the Vampire on B3. Doing so reveals the staircase to B4. From the entrance, head northwest to a treasure room that contains **11,825 gil** and a **Staff**. There are several encounter points in this room, complete with

Cavern of Earth, B5

This floor is sparsely populated, so it should be a quick trip to the boss. Go north, west, south, then west again to reach the boss's door. Heal your party, save your game, and go meet the Fiend of Earth, Lich.

LICH

Lich has 1200 HP and a fairly high physical defense rating. He is vulnerable to Fire, so use your Black and Red Mages contribute to the Lich's demise. Have

HP	ATK	DEF	MDEF
1200	40	40	120
GIL			
3000			
2200			
WEAK	Fire, Dia		

your White Mages cast Dia spells, although their first priority is tending to the party's dead and wounded. Lich isn't the strongest physical attacker (although his attacks can stun your party members), but he does have plenty of nasty spells like Blizzara, Fira, Thundara, Sleepra, Haste, and so on. Blizzara seems to be Lich's favorite, so remember to use NulFrost if the boss casts Blizzara.

Defeating Lich causes a portal to appear in the back of this room. After reactivating your party's Earth Crystal, enter the portal for a free ride back to the overworld.

2

Get the Canoe from the Twelve Sages.

3

Travel upriver to Mt. Gulg.

4

Battle the Fire Fiend, Marilith, for the Fire Crystal.

SHOPPING RECOMMENDATIONS

Equipment and Items

If your Warriors aren't clad from head to toe in Mythril, then purchase some here. New items include the Mythril Gloves and the Buckler, which is the first shield usable by Thieves and Red Mages. Its defensive power is only 2, but that's more than either of those classes had available before. The Mythril Axe is the only new weapon, and it's worth picking up if you have multiple Warriors. (Note, however, that there is a free one in the next dungeon.)

Spells

The level 6 spells break the bank at 13,000 gil per spell, but they offer a few exciting choices. White Mages can choose between Protera, Invisira, and Stona. All of these are good options, but don't provide the help needed in the near future. Protera is a good choice for now, but resist the temptation to get Invisira. Stona is a must later on and you want to save a slot for Exit after the class change.

A sure-fire option for Black Mages is Thundaga. Death sounds more powerful than Stun, but Stun is perhaps the better choice since it has a higher success rate. Quake has a lower chance of an instant kill than Death, but it reliably wipes out about half of a large group of enemies, so it's a little more useful.

At this point, it's best to avoid any purchases for Red Mages since they can't learn any level 6 spells until the class change. When this occurs, they're limited to Exit, Protera, Invisira, and Thundaga.

Canoe

Crescent Lake Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	DL	EXP
Anaconda	80	22	10	56	—	50	165
Ankheg	222	39	20	116	—	300	1194
Hill Gigas	240	38	12	120	—	879	879
Minotaur	164	22	4	95	—	489	489
Ogre Chief	132	23	14	71	—	300	282
Ogre Mage	144	23	10	80	—	723	723
Scorpion	84	22	10	55	—	70	225
Troll	184	24	12	100	Fire	621	621

Ankhegs are the new foes in this area, but old favorites like Ogres, Trolls, Hill Gigas, and Scorpions appear in greater numbers. Since Crescent Lake is close by, you can obliterate large groups of foes with your best spells. Note that magic won't be enough to take down the hardy Ankhegs. These foes have 222 HP and no magical weaknesses, so try to employ Haste-enhanced fighters against them.

The Town of Crescent Lake

Sail southwest from Melmond, past the tip of the peninsula with the Cavern of Earth and due west across the sea. This leads to the east shore of the continent between two ports. Disembark at the southern port and start hiking southwest. There are some grueling battles here, so hit the foes with everything you have since there isn't far to go. Cross a large patch of forest, loop around below the lake, and locate the small town of Crescent Lake.

Don't be confused by Crescent Lake's odd layout. There's actually more to this town than a handful of shops. Cross the small stone bridge to the northeast and follow the path to the field where the sages await. If you have defeated the Lich in the Cavern of Earth, the sages discuss the remaining fiends and provide a **Canoe**.

Canoeing to Mt. Gulg

River Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	QIL	EXP
Crocodile	184	42	16	103	Lightning	900	816
Hydra	212	30	14	116	—	150	915
Neochu	344	35	32	170	—	500	3189
Ochu	208	20	24	116	Lightning	102	1224
Piranha	92	22	0	68	Lightning	20	240
Red Piranha	172	37	20	83	—	46	546
White Croc	288	56	20	143	Lightning	2000	1890

You will encounter some extremely tough foes while using the Canoe. These foes put the denizens of Mt. Gulg to shame, so be careful while traveling the world's network of rivers.

Most enemies on the river share a weakness to **Lightning**, including the deadly Crocodile and White Croc. These foes don't lack HP, but they have sufficient attack power to cause triple-digit damage to the non-Warriors in your party. Crocodiles of both types usually appear with groups of enemies, so have Black Mages cast Thundara while melee types target the Crocs. Ignore the Piranhas that accompany Crocodiles; they're weak across the board, so Thundara is a great option.

The Ochu foe is also vulnerable to Thunder, but the stronger Neochus are not. Both are hardy and capable of inflicting poison, making them a significant threat. Focus on them after the Crocs but before the Piranhas, Red Piranhas, and Hydras (the weakest of the river monsters).

The river is the best place to visit when you need to quickly level up. While it is risky to do so, river enemies are worth lots of EXP—up to 3189 from the Neochus!

The Canoe allows for travel on rivers and lakes, such as the ones around Crescent Lake. Take the river route west, then turn north at the second fork. Pass the first northwest fork (it leads nowhere) and go north down the second route. When that path forks, head due west to Mt. Gulg where the Fire Fiend has made her home.

Sphinx	228	23	12	115	—	1160	1160
Wraith	86	22	4	52	Fire, Dia	231	231

The legion of new foes in Mt. Gulg is a dangerous bunch. Most of them are vulnerable to Ice, so consider a party focused around Black Magic. The trick is to determine which encounters are worthy of Blizzara spells. (MP won't last long if used in every encounter!) Alas, this level 4 spell is the strongest option. Firaga isn't the most effective option, and you're better off saving Thundaga for river enemies.

Topping the danger list are Fire Elementals, Lava Worms, Fire Gigas, Fire Lizards, and Hellhounds. Fire Gigas have incredibly high attack ratings, wrecking havoc against your party with their standard attacks. Fire Lizards lack offensive firepower, but they have the ability to cast Fire-type magic spells that affect the entire party. If any White or Red Mages have NulBlaze, then use it against large packs of these enemies. Fire Elementals and Lava Worms are strong foes with solid attack and defense ratings. Fortunately, Lava Worms always travel alone and Fire Elementals never attack in groups of more than two.

Another potential threat, the rare Red Dragon, has no weakness and it sports the highest attack rating in Mt. Gulg. When fighting these beasts, use Haste-enhanced fighters. Pyrolisks lack the statistical power of the Red Dragons, but their Gaze attack can drop a foe in one hit. Don't waste Blizzara; with only 44 HP, even Thundara can clear the field of these fragile foes.

The most common enemy in the volcano is the Horned Devil. These bothersome creatures are resistant to Ice, so use physical attacks to dispose of them.

Mt. Gulg, B1

Don't waste much time trying to find a way around the lava in Mt. Gulg, because there isn't one. Your party will lose 1 HP with each step it takes on the lava, however, no enemies will attack while this is going on. As bizarre as it sounds, if you're low on health and running for the exit, the best strategy is to stay knee-deep in boiling magma whenever possible.

Mt. Gulg, B2

The stairs down to B3 are across the lava to the west of the entrance. If you don't need gil or EXP, you can proceed in that direction but you should still make a quick foray to the Great Sword. There aren't any "special" treasures to find in this area, but it's worth the time to raid the 18 chests on this floor. Not only will your party gain plenty of gil and other goodies, but they will also earn plenty of EXP from defeating the powerful guardians protecting the chests.

The shortest route is to head west from the stairs and go through the second door to the west. Carefully navigate the winding passages, hitting the chests in order of their appearance. The chests are protected by encounter points. When triggered, it forces a battle against one or two Fire Elementals. To defeat them, try using Blizzard or Blizzara.

A keen item of interest on this floor is the **Great Sword**, which is unavailable anywhere else in the game. Its attack power is slightly weaker than the Mythril Sword (by 2 points), but it is more accurate (5 points). It inflicts additional damage against Giant-class enemies, like Gigas and Ogres.

Head to the top of the cave, then proceed to the west. There are two chests with a total of 1445 gil between them, although they are protected by another Fire Elemental encounter point. Continue south to find the large room with the other chests. There's an encounter point near the entrance, but only one encounter point inside the actual room. That encounter point is located at the spot where the party is surrounded by chests on six sides. This time, though, the enemy is the feisty Lava Worm. This powerful foe deals more damage than the Fire Elementals, so use Blizzard to defeat it within a turn or two. The chests contain gil, Mythril armaments, and basic supplies. Check out the maps for the contents of the other chests.

Mt. Gulg, B4-B

The staircase leads to a rather interesting area of B4-B—a place with 15 chests. One of the better items you'll find is the powerful Ice Brand, which is extremely useful in these lava filled areas. Don't forget to find the Flame Shield, too.

Pick up both major items, as well as a nice chunk of gil, in the room at the west end of the hall. A lone Lava Worm encounter spot guards these chests. Continue southeast from there to pass a room with a single chest (containing 1760 gil) and another room with two chests (a paltry 155 gil, and a Lava Worm to boot!) at a fork in the road. The east path leads to a room with three more chests. One of them is a duplicate of the Ice Brand chest (it may be empty if you have one already), while the others contain 2000 gil and a Cottage.

Follow the south fork to reach the stairs that lead to the next level. Look for a room with two chests (1250 gil and a Staff), guarded by a Fire Lizard encounter point.

Mount Gulg, B3-A, B4-A, B3-B

Head east through the lava filled corridor of B3-A, then travel southeast in the small segment of B4 that follows. Locate the staircase in that corner and follow it up to a new portion of the third floor (B3-B). This area is equally barren (there are no chests on B3), but it's larger and much easier to get lost while traveling to the staircase in the southwest corner. There's still plenty of lava here, so keep an eye on your party's HP.

Mt. Gulg, B5

This large area is surprisingly devoid of goodies. The three chests in the east, northeast, and southeast corners all contain the same **Gold Needle** (it won't be there if you grabbed it on B4-B). In effect, this means that only the chest to the west is considered "new." The chest contains the **Flame Mail**; save this armor for a dungeon that you'll visit in the near future. Unfortunately, encounter points with a Fire Lizard and a Red Dragon block the way. Both foes use Fire-type magic spells to decimate the party, so use NulBlaze if it's available. If not, hit them hard to quickly cut through their health.

The room in the southwest corner holds the Fire Crystal. Any attempt to touch this crystal awakens Marilith. After defeating the fiend, use the portal that appears behind the crystal to return to the world map.

MARILITH

Marilith's damage spells are all fire-based and her physical attacks can connect multiple times. Use a combination of NulBlaze and Slow to reduce the amount of damage she can cause. Marilith can also cast Dark and Bind. Have your Red and Black Mages

HP	ATK	DEF
1440	40	50
WDEF	MIL	EXP
183	3000	2475

WEAK

Paralysis, Darkness, Sleep, Silence, Confusion, Mind

use their spells to cast Slow on Marilith and Haste on everyone capable of dealing physical damage since it is the key to winning this fight. Have your healers keep the fighters healthy, and let the others concentrate on depleting Marilith's health. If you're feeling especially lucky, try casting Hold or Stun on Marilith for an advantage. While it may not connect, it does work on occasion. If you picked up the Confuse spell back in Elfheim, use it; Marilith is weak against it and it can quickly turn the tide of battle in your favor if it connects.

Walkthrough

Hellfire Chasm Available

Defeating Marilith opens the portal to Hellfire Chasm. The party can't visit the chasm where the chasm exists yet, but that may change soon enough...

THE WATER CRYSTAL

CAVERN OF ICE

Objectives

1 Retrieve the Levistone from the Cavern of Ice, north of Mt. Gulg.

2 Sail south to the Ryukahn Desert.

3 Travel to the Citadel and hand over the Crown.

4 Battle the Dragon Zombies for the Rat's Tail.

5 Deliver the Rat's Tail to Bahamut.

6 Fly to Gaia in the northeast.

7 Purchase the Faerie's Bottle at the Caravan.

8 Release the Faerie at the pond in Gaia.

9 Travel across the river to Onrac.

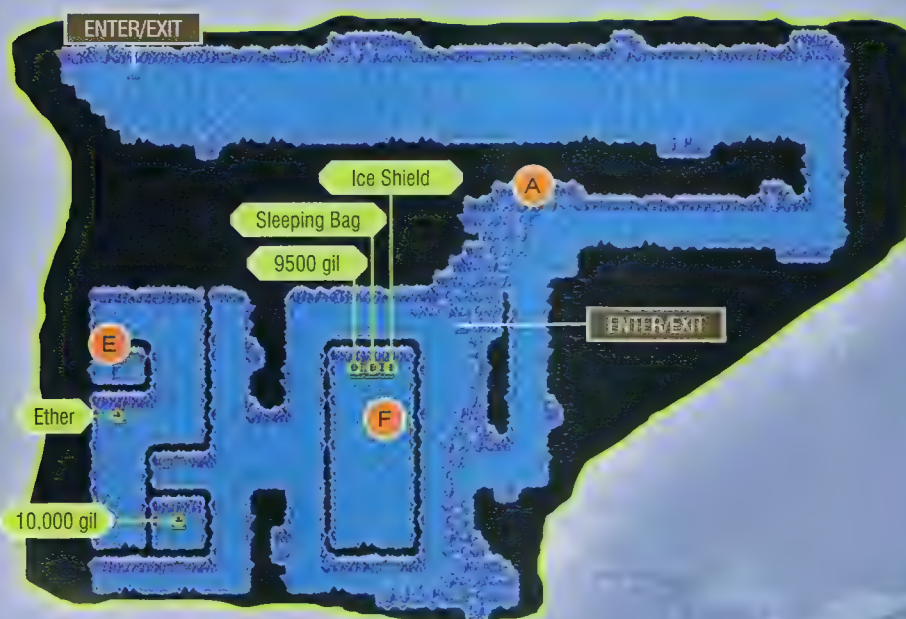

10 Plunder the Warp Cube from the Waterfall Cave.

11 Retrieve the Rosetta Stone from the Sunken Shrine.

12 Defeat the Water Fiend, Kraken, in the Shrine's lowest floor.

Mummy	80	30	20	60	Fire, Dia	300	300
Piscodemon	84	30	16	98	—	300	276
Remorazz	320	73	24	185	—	1000	2244
Specter	114	40	12	67	Fire, Dia	432	432
White Dragon	200	53	8	196	Lightning, Fire	2000	1701
Wight	52	20	12	45	Fire, Dia	150	150
Winter Wolf	92	25	0	55	Fire	200	402
Wraith	86	22	4	52	Fire, Dia	231	231

There are three enemy types in the Cavern of Ice: Undead, Ice beasts, and Magicians. Standard tactics for slaying Undead foes work fine against the Mummies, Wraiths, Specters and others, so use Dia if you have a White Mage, and Firga and Firaga if you don't. You may want to use both against Mummies and Specters, just in case one of the casters ends up paralyzed or asleep.

Ice enemies include White Dragons, Ice Gigas, and Winter Wolves. All three, predictably, are vulnerable to Fire. Have a Warrior equip the Flame Sword as soon as it is available and have Black and Red Mages use lower-level Fire spells (save the best stuff for the Magicians). Ice Gigas and White Dragons both have fairly strong magic resistance stats, so it takes a combination of strong physical attacks and Fire-type spells to take them out before they can start wreaking havoc with an Icestorm.

The Mindflayers are perhaps the most dangerous foes. Piscodemons aren't so bad, but Dark Wizards and Mindflayers have interesting spells like Trance (which can paralyze the entire party), Reaper, Firaga and Thundaga. As a bonus, any physical attack a Mindflayer lands may result in an instant kill. Magicians only have 112 HP (Dark Wizards have 105), so killing them quickly is the way to go. Have all of your offensive spell casters use their best spells (neither foe has any particular weaknesses or resistances, but both are generally resistant to Magic) while the offensive line targets them individually to cause more damage.

The Search for the Levistone

The goal is to go to the Cavern of Ice and retrieve the Levistone, which is a Key Item that leads to the Airship. Heal up and restock on any necessary items at Crescent Lake, then return to the ship. Sail to the north until you find another port. You can leave the ship at the dock, or take it straight to the mouth of the river and hop into the Canoe.

There are many dead ends in this segment of the river, so follow the mountains to the right and head north to get through the first part. At this point, there are two paths: an upper and a lower path, both of which lead to the west. Follow the lower path heading west to find a small, grassy area with the entrance to the Cavern of Ice.

Cavern of Ice, B1-B3

You can't access all of the good stuff in B1 without taking the long way around, so head straight to the staircase. Go east or south in B2, but note that both paths are the same length and lead to the same place—the staircase that leads down to B3.

Cavern of Ice, B3-B4

Take the other staircase in B3 to find a much more interesting area of B2. Circle around to the large room, then take a good look around before looting the chests. The **Levistone** is between the two chests, but watch out for the tiny cracks. If you step on one, the party will drop through the floor to B4. This is a place you must eventually visit, but if you want to pick up the treasure on the left first (the **Flame Sword**), go around the cracks and get it from above. Plunder the chest on the right using a similar method to acquire **Clothes**. Alas, there is no way to get to the **Levistone** at this point, so step on a crack to proceed.

Cavern of Ice, B4

There's an encounter point in the middle of the room, so prepare for a fight against a legion of **Undead Specters**. Beyond the door, there are chunks of blue ice on the ground. These chunks function like the lava in Mt. Gulg; they cause 1 HP of damage to each party member with each step. Once on the ice chunks, however, the party is free of enemy encounters.

Cross the blue ice to the west to reach a room with two chests (**Mythril Gloves** and **Ice Armor**) guarded by a **White Dragon** encounter point. The dragon has 200 HP and it is vulnerable to **Fire** and **Thunder**. If you haven't completed Mt. Gulg yet, the **Ice Armor** will come in handy. Besides its resistance to **Fire**, its stats are identical to the **Flame Armor**.

To proceed, cross the blue ice to the south, then cut east while still on the ice to prevent the party from getting stuck at a dead end. There is a treasure room with six chests directly south of the ice patch's exit. Plunder these chests to acquire 30,000 gil! Surely that's worth a fight with a pack of **Winter Wolves**. From the treasure room, follow the south wall to the east to end up at the stairs.

Cavern of Ice, B1

The stairs bypass two entire floors and lead directly to the section of B1 that was previously unreachable. The chest right outside the stairwell contains an **Ether**, but the unguarded chest in the small room on the way out contains a respectable 10,000 gil.

Before entering the room to the east, take a moment to assess the state of your party. The stairs in the northeast corner lead back outside, so make sure your party is in top fighting condition. If you go outside to use a Cottage, the party re-enters the area back at the original entrance. This means you must travel through the dungeon again.

If your party is in good shape (and you don't need to use a Cottage), then head into the room to the west to find 9500 gil, a Sleeping Bag, and an Ice Shield. Next, step on the crack to go back down to B2. This action causes the party to land near the Levistone. As the party approaches it, a battle against Evil Eye ensues.

EVIL EYE

The bad news: Evil Eye knows every nasty spell in the game (including Doom). The good news: This boss only has 162 HP. Hit it with the party's strongest standard

attacks and most powerful spells. An efficient use of attacks and spells will eliminate the Evil Eye within a round or two before it can take down too many party members.

Getting the Airship

Grab the Levistone, then jump down a crack to either side (going south leads to another Evil Eye encounter). Work through B4 to reach the staircase in Level B1, then ride the river back to the ship.

Go south of Crescent Lake to a point where the sea meets up with a river near a patch of desert. Hop into the Canoe briefly, then quickly step to the west to reach dry land. Walk around the mountains to reach the desert.

Walk into the desert to make the Airship rise out of the sand. The world is now at your fingertips! You can make your first priority the long awaited Class Change, or you can make a pit stop at the town of Gaia first. There is a new spell to purchase (Blizzaga for Black Mages is the only one that doesn't require a Class Change) and some pricey new armor.

THE CITADEL OF TRIALS

Encounters Outside the Citadel

NAME	HP	ATK	DEF	MDEF	WEAT	EXP	EXP
Basilisk	196	30	20	91	-	658	1977
Hydra	212	30	14	116	-	150	915
Lesser Tiger	132	22	8	85	-	108	438
Ochu	208	20	24	116	Lightning	102	1224
Sabertooth	200	24	8	106	-	500	843
Sand Worm	200	46	14	103	-	900	2683
Sphinx	228	23	12	115	-	1160	1160
Weretiger	160	30	16	93	-	780	780
Wurm	260	40	22	131	-	502	1218

If you take the Airship, expect a number of battles on the long walk to the Citadel. Most of these encounters are against Weretigers (a poisonous foe) and Sabertooths. Rarer but more dangerous new foes include the Sand Worm (kill it quickly before it can use *Quake*), the Basilisk (bring plenty of Gold Needles), and the Wurm.

Encounters Inside the Citadel

NAME	HP	ATK	DEF	MDEF	WEAT	EXP	EXP
Clay Golem	176	64	7	93	-	800	1257
Dragon Zombie	268	56	30	135	Fire, Dia	999	2331
Horned Devil	94	10	32	157	-	387	387
King Mummy	188	43	24	95	Fire, Dia	1000	984
Medusa	68	20	10	55	-	699	699
Mindflayer	112	1	12	187	-	999	822
Mummy	80	30	20	60	Fire, Dia	300	300
Minotaur	224	40	14	116	Fire, Dia	1050	1050
Zombie							
Nightmare	200	30	24	100	Ice	700	1272
Rakshasa	110	20	30	62	-	800	603

New Undead creatures in the Citadel include King Mummies, Zombie Dragons, and Minotaur Zombies. All of these foes are vulnerable to Fire and Dia-type spells, so they shouldn't cause too much trouble.

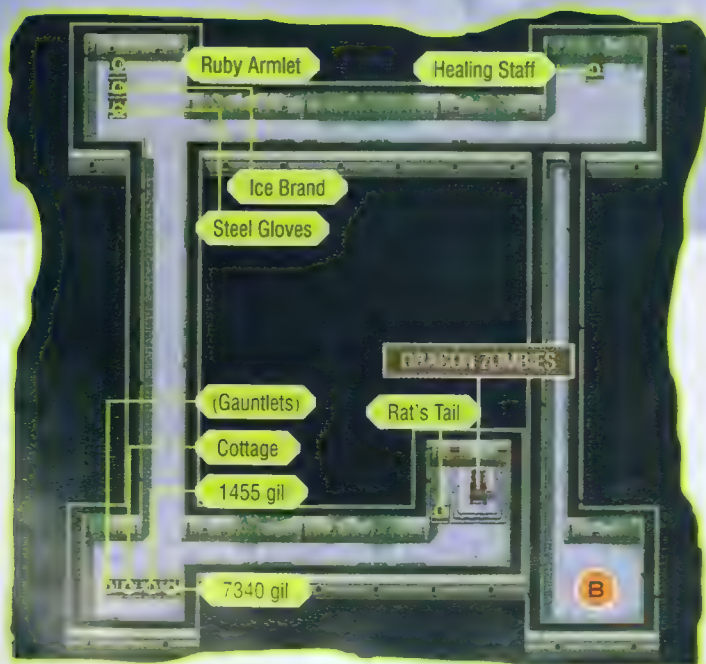

Clay Golems and Rakshasas are resistant to almost everything, so rely on physical attacks to dispose of them. Nightmares are weak against Ice, but may not even be worth your casters' time, since the worst they can do is cast *Darkness* on your party. Go ahead and break out some offensive magic against the Medusas, as they can turn your party to stone. With only 68 HP, use a high-level spell of any type to wipe them out.

THE CITADEL OF TRIALS

- Cottage
- Gauntlets
- Healing Staff
- Ice Brand
- Rat's Tail
- Ruby Armlet
- Steel Gloves

The Citadel of Trials is in the north-central part of the map, on the western edge of the bird-shaped northeast continent. There are two ways to get there: fly the Airship to the tip of the peninsula to the north of the Castle and walk from the small patch of grass, or sail the ship to the mouth of the river northeast of the castle and switch to the Canoe. The ship/Canoe route involves less walking, but sailing back and forth when you have a new Airship isn't much fun!

The Citadel, 1F

Present the Crown to the elderly man on the first floor and he reveals the goal of the challenge. There's not much to see here, so head to the northwest, open the door, and touch the throne. Doing so warps the party to the confusing second floor.

The Citadel, 2F

There are 15 warps here. To reach the staircase, you must follow a specific order. Fortunately, the warps seem to reset the counter of steps between enemies, so as long as you continue to warp, there's little need to worry about combat. The correct order is 1-2-3-5-6-8-9-10-14. After you hit warp 10, stop inside the room in the northeast to find this floor's lone treasure chest. Defeat the Clay Golems at the encounter point directly in front of it, then open the chest to find the **Gauntlets**. If you miss the Gauntlets here, they will appear again on the next level.

The Citadel, 3F

After using the final warp, the party ends up on the third floor. The route to the ultimate prize is a simple loop, but many powerful enemies wait along the way. This room has lots of chests, but only one encounter point. There are several Nightmares positioned inside the door to the north of the warp point. Expect to fight them again if you want to get that first chest, but it's well worth it. The **Healing Staff** is a must-have item. After that, get the **Ruby Armlet**, another **Ice Brand**, and **Steel Gloves** from the next set of chests. Finally, don't forget the **Cottage** and 8795 gil from the chests in the southwest.

Using Combat Items

There are many ways to use items in combat. You can use them to heal your party, to attack your enemies, or to use status effects. The most common way to use items is to select them from the command menu and use them on a target.

Items can also be used to summon powerful allies to help you in battle. These allies are called Eidols, and they can be used to fight enemies that are too strong for your party.

Items can also be used to change the stats of your party members. For example, you can use the **Power Armlet** to increase your party's attack power.

Items can also be used to change the stats of your enemies. For example, you can use the **Power Armlet** to increase your enemy's attack power.

Items can also be used to change the stats of your party members. For example, you can use the **Power Armlet** to increase your party's attack power.

Items can also be used to change the stats of your enemies. For example, you can use the **Power Armlet** to increase your enemy's attack power.

Heal the entire party before approaching the treasure chest near the throne. Collect the Rat's Tail, then prepare for an encounter point directly in front of the throne. After defeating the Dragon Zombies, touch the throne to warp back to the entrance.

DRAGON ZOMBIE

Hit the Dragon Zombies with Dia-type and Fire-type spells. Let your Warriors hack away with the Flame Sword and these foes will become toast in no time at all. Still have plenty of health and spells left? Back up and hit the encounter point again! Dragon Zombies are worth 2331 EXP a pop.

Introducing Bahamut

All that's left to do is take the Rat's Tail to Bahamut (yes, that Bahamut!) and receive your reward. Find him in the Dragon Caves, located on the chain of islands just southwest of the Citadel of Trials. The name sounds menacing, but all the dragons in the Dragon Caves are friendly and there are no random encounters.

There are six entrances to the Dragon Caves (the seventh hole leads to Hellfire Chasm) and each entrance leads to a different area. If you want to plunder all of the chests and talk to all of the Dragons, you must use each entrance. If you're not interested in that, go into the furthest east cave to get the loot (nearly 20,000 gil) and enter the southeast cave on the island with two caves to see Bahamut.

Class Change Time

After the class promotions, celebrate by flying around the world to pick up new spells and items.

- Knights can use White Magic up to level 3. Ninjas can use Black Magic up to level 4. Return to the game's first few towns to buy the spells.
- Ninjas and Red Wizards can equip better weapons and defensive items.
- Return to Melmond to buy Teleport for your Black Wizards.
- Return to Crescent Lake to buy Exit for your White Wizards.
- Purchase the following for Red Wizards: Vox in Elfheim; Life, Teleport, and Scourge in Melmond; and Invisira, Protera, Exit, and Thundaga in Crescent Lake.

SHOPPING RECOMMENDATIONS

Equipment and Items

There's only one weapon for sale here—the Cat Claws. For Black Wizards, this is the best weapon in the game. However, it's overpriced for any other class types. Still, it's difficult to justify such a price, especially when the armor here is so much more useful.

The Protect Ring has the additional property of protecting its wearer from instant-death attacks, so grab at least one for your party's designated healer. Consider buying Ruby Armlets, a great piece of light armor, for your non-fighters.

Spells

There are only two level 7 spells of each type sold in Gaia, while the other two are sold at Onrac. Both level 7 spells are good for White Wizards, so don't worry about leaving slots open. Pick up Blizzaga for Black Wizards and Break if you have the extra gil.

The missing level 8 spells are sold at Lufenia, so save a spot for each. For now, consider Holy and NulAll for your White Wizards. For Black Mages, it's a toss-up. Stop paralyzes all enemies. Warp is a more powerful Quake (but no longer ground-based), while Kill has the potential for an instant-kill versus most non-bosses. Whatever you choose, leave an open slot for Flare. Lastly, purchase Blizzaga for Red Wizards since it's the last Black Magic spell they can learn.

Caravan/Onrac Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	DL	EXP
Baretta	256	60	38	130	—	300	1428
Desert Baretta	352	98	48	156	—	1	2610
Hellhound	192	30	8	103	Ice	600	1182

Troll	184	24	12	100	Fire	621	621
Sphinx	228	23	12	115	—	1160	1160
Wyrm	260	40	22	131	—	502	1218
Wyvern	212	30	12	115	—	50	1173

There are a handful of new enemies in this area, most of which won't be a threat to a mid-level party. Baretas and Desert Baretas have plenty of HP, high defense, and devastating attack scores.

The Town of Gaia

Gaia, the eye of the bird-shaped northeast continent, is the most accessible town in the north. Although this venture serves mainly as a shopping trip, listen closely to what the villagers have to say about the missing Faerie. Its safe recovery is the next objective. Recovering the Faerie costs 40,000 gil, so shop accordingly.

Hunt for the Caravan

The missing Faerie is hidden in the Caravan in the desert at the center of the northwest continent. It's not visible on the map, but the Onrac villagers point to the small patch of desert to the west of a small grove of trees. Park the Airship at the patch of grass just southeast of the desert and march over to the designated location.

Buy Back the Faerie

The only item initially for sale at the Caravan is the **Faerie's Bottle** for 40,000 gil. If you're short on cash, don't waste any time since the enemies don't drop much gil. Instead, infiltrate the Waterfall Cavern where the enemies drop more gil and there's 25,000 gil to plunder from the treasure chests.

On return visits to the Caravan, the shop's inventory changes to items that temporarily raise a character's stats. These items are usable only during combat.

Tonic Shop

ITEM	COST	EFFECT
Giant's Tonic	1500 gil	Temporarily raises max HP.
Faerie Tonic	1500 gil	Temporarily raises max MP.
Strength Tonic	1000 gil	Temporarily raises attack.
Protect Drink	1000 gil	Temporarily raises defense.
Speed Drink	1000 gil	Temporarily raises agility.

Return to Gaia

Take the Bottled Faerie back to Gaia and visit the Faerie pond in the northeast section of town. The Faerie retrieves a bottle filled with **Oxyale**, which allows the party to breathe underwater.

Healaga	30,000 gil	

Black Magic, Level 7

SPELL	COST	CLASS
Saber	30,000 gil	
Blind	30,000 gil	

SHOPPING RECOMMENDATIONS

Spells

There are no armaments for sale, just a couple of spells. White Wizards may find some use for Healaga, but NulDeath (which protects against instant-death effects) doesn't really come in that handy, especially with all of the Ribbons and Protect Rings floating around. NulDeath will serve as a decent option for Red Wizards, though.

Black Wizards can choose between the mediocre Saber, which raises combat stats to near fighter levels, but it can't be used on any other character. There's also Blind, which can only affect one enemy.

Waterfall Cavern Encounters

ENEMY	HP	EXP	EXP	EXP	EXP	EXP	EXP
Clay Golem	176	64	7	93	-	800	1257
Cockatrice	50	1	4	47	-	200	186
Green Dragon	352	72	16	200	Ice	5000	4068
King Mummy	188	43	24	95	Fire, Dia	1000	984
Mummy	80	30	20	60	Fire, Dia	300	300
Nightmare	200	30	24	100	Ice	700	1272
Pyrolisk	44	20	40	45	Ice	500	423

With one exception, you've seen all of these enemies in previous dungeons. That one exception is the Green Dragon, a rare monster that is no pushover. It has high magic resistance, but Ice spells can still cause a little damage. This foe lacks physical defense, but it has 352 HP and can dish out damage. Think about using a Haste spell to finish things quickly.

Cockatrice	6	Carter	368/	643	0
Pyrolisk	1	Garrik	163/	298	263
King Mummy	1	Gardn	302/	356	0
Mummy	1	Scott	213/	236	312

Onrac

Fly back to the same parking spot southeast of the desert, the one used previously to reach the Caravan. From there, travel across the river and walk a short distance to Onrac. Purchase a few spells and listen for gossip about the Sunken Shrine and the nearby Waterfall Cavern.

THE WATERFALL CAVERN

Defender
Ribbon
Wizard's Staff
Warp Cube

Steer the Canoe upriver, directly into the waterfall northwest of town. This is a simple cave; all of the branches lead absolutely nowhere and everything of any value is in the same spot. To get there, just hug the left wall from the entrance to reach a room with six chests, a random encounter spot, and a robot.

The treasures include the **Wizard's Staff**, **Ribbon**, and **Defender**. The Wizard's Staff and Defender are combat items that cast Confuse and Blink, respectively. The Ribbon, a *Final Fantasy* classic, protects its wearer from all status effects. Lastly, don't forget to talk to the Robot to acquire the **Warp Cube**, a Key Item you will need later.

You obtain the warp cube.

THE SUNKEN SHRINE

- Antidote

Water Naga	356	9	8	116	Lightning	2355	2355
White Shark	344	50	8	170	Lightning	600	2361

None of the commonly encountered Sunken Shrine enemies are particularly deadly, but they attack relentlessly in large groups, making this dungeon a painful ordeal. New foes include Sea Trolls, Sea Scorpions, Deepeyes, Sea Snakes, various Sahagin, White Sharks, Water Nagas, and Water Elementals.

Virtually everything here is vulnerable to Lightning, so utilize a lone Red or Black Wizard and have another party member use the Gauntlets. On the other hand, the Water Elementals are vulnerable to Ice—not Lightning—and the Ghosts and Mummies are vulnerable to typical Undead weaknesses.

The most dangerous foes are the White Sharks, which have 344 HP and an attack rating of 50. The Sahagin Princes come in a close second, so have your offensive line target them and leave the weaker Sahagin Chiefs to the spell casters' electrical assault.

The Makeshift Submarine

Bring the Oxyale to the girl in the southeast corner of Onrac. Upon doing so, she hands over her submarine. It leads directly to the Sunken Shrine, a large underwater dungeon.

There are two different objectives here: recover the Rosetta Stone from the top level of the shrine, or defeat the Water Fiend, Kraken, at the bottom of the shrine. You can do the quests in any order, but it makes sense to get the Rosetta Stone first so the party can benefit from the items and EXP acquired along the way prior to the battle with the Water Fiend.

Rosetta Stone 1—Sunken Shrine, 3F

The submarine drops off the party on the third floor. There are stairs leading both up and down. The Rosetta Stone is on the shrine's top floor, so take the staircase in the northeast that leads up.

The third floor of the Sunken Shrine is full of empty rooms. There are only two treasure chests, both of which contain gil. The chest in the room south of the down staircase (in the northwest) is the only one that contains a substantial amount of money, 9900 gil.

Rosetta Stone 2—Sunken Shrine, 4F

The down staircase leads to 4F, where the treasure starts getting good. The first room is empty, but every other room contains a chest. Note that all of the chests are well worth the trouble. The **Diamond Armor**, a nice upgrade for a Knight, is inside the north room.

The large room directly south of that, in the center of this floor, contains only 20 gil. A much better treasure waits in the room in the southwest corner: a **Light Axe**. As a weapon it's somewhat unimpressive, but any character can use it in combat to cast Diara. Continue east and stop in the next room to collect a **Mage's Staff**, a combat ability weapon that can cast Fira. The final room (further west) has a chest with 12,350 gil. The staircase leading down is located just outside this room.

Rosetta Stone 3—Mermaid City

The stairs lead to 5F, a floor that is free of enemies but full of treasure. Each room contains a mermaid that will reveal information, plus most of the rooms have treasure chests.

The treasure tally includes: the **Diamond Armlet**, **Diamond Shield**, and over 30,000 gil. The Rosetta Stone is in the northwest corner of the map. Take the path that looks like it may lead off-screen; in fact, it leads to the path in the northeast corner, where you can access the last room. Open the chests to get the **Diamond Helm**, **Diamond Gauntlet**, and **Rosetta Stone**.

Take the stairs back up to the submarine, or use the Exit spell to teleport out. Heal your party and buy supplies in Onrac before revisiting the Sunken Shrine to battle the Water Fiend.

Water Fiend 1—Sunken Shrine, 3F

Take the submarine back to 3F, then head to the down staircase in the northwest. This leads to the east side of 2F, a large floor that has eroded into two separate areas. There's no treasure on one side, so head directly north to another staircase (this one leads up). This staircase leads to the tiny area of 3F (and to the stairs that lead to 4F). Area 3F has no features except for a staircase down to 3F. There are two chests in 3F and they each contain 560 gil. Go through the door in the south and head down the stairs to the west side of 2F.

Water Fiend 2—Sunken Shrine, 2F

This side of 2F is rich in treasure. The two chests in the room directly south of the entry area contain over 15,000 gil. They're guarded by the Sea Shrine's first encounter spot, a fight against several Water Elementals.

Travel to the room in the west, where you'll find more gil and the invaluable **Giant's Gloves**. The loot is guarded by two encounter spots: more Water Elementals and some Sea Scorpions. From that room, head north to a room with a single chest. Battle more Sea Trolls/Snakes/Scorpions in the spot in front of the chest, then open the chest to reveal another **Light Axe**.

Head directly west from that room to reach the final treasure room. You must defeat an encounter of mixed Sahagin and White Sharks, a small price to pay to get another **Ribbon** and 20,000 gil. The staircase is just northwest of that room.

Using Combat Items II

The Kraken is a powerful enemy, and using the right combat items is crucial. The Kraken is resistant to Fire, so avoid using Fire-based attacks. Instead, use Lightning-based attacks, as the Kraken is weak to them. The Kraken is also resistant to Water, so avoid using Water-based attacks. The Kraken is also resistant to Wind, so avoid using Wind-based attacks. The Kraken is also resistant to Earth, so avoid using Earth-based attacks. The Kraken is also resistant to Ice, so avoid using Ice-based attacks. The Kraken is also resistant to Poison, so avoid using Poison-based attacks. The Kraken is also resistant to Sleep, so avoid using Sleep-based attacks. The Kraken is also resistant to Confusion, so avoid using Confusion-based attacks. The Kraken is also resistant to Silence, so avoid using Silence-based attacks. The Kraken is also resistant to Invisible, so avoid using Invisible-based attacks. The Kraken is also resistant to Invisibility, so avoid using Invisibility-based attacks. The Kraken is also resistant to Paralysis, so avoid using Paralysis-based attacks. The Kraken is also resistant to Petrification, so avoid using Petrification-based attacks. The Kraken is also resistant to Curse, so avoid using Curse-based attacks. The Kraken is also resistant to Blessing, so avoid using Blessing-based attacks. The Kraken is also resistant to Holy, so avoid using Holy-based attacks. The Kraken is also resistant to Unholy, so avoid using Unholy-based attacks. The Kraken is also resistant to Death, so avoid using Death-based attacks. The Kraken is also resistant to Life, so avoid using Life-based attacks. The Kraken is also resistant to Summoning, so avoid using Summoning-based attacks. The Kraken is also resistant to Disenchanting, so avoid using Disenchanting-based attacks. The Kraken is also resistant to Enchanting, so avoid using Enchanting-based attacks. The Kraken is also resistant to Transmutation, so avoid using Transmutation-based attacks. The Kraken is also resistant to Alchemy, so avoid using Alchemy-based attacks. The Kraken is also resistant to Cooking, so avoid using Cooking-based attacks. The Kraken is also resistant to Fishing, so avoid using Fishing-based attacks. The Kraken is also resistant to Mining, so avoid using Mining-based attacks. The Kraken is also resistant to Woodworking, so avoid using Woodworking-based attacks. The Kraken is also resistant to Blacksmithing, so avoid using Blacksmithing-based attacks. The Kraken is also resistant to Leatherworking, so avoid using Leatherworking-based attacks. The Kraken is also resistant to Tailoring, so avoid using Tailoring-based attacks. The Kraken is also resistant to Hairdressing, so avoid using Hairdressing-based attacks. The Kraken is also resistant to Barbering, so avoid using Barbering-based attacks. The Kraken is also resistant to Farming, so avoid using Farming-based attacks. The Kraken is also resistant to Gardening, so avoid using Gardening-based attacks. The Kraken is also resistant to Hunting, so avoid using Hunting-based attacks. The Kraken is also resistant to Fishing, so avoid using Fishing-based attacks. The Kraken is also resistant to Mining, so avoid using Mining-based attacks. The Kraken is also resistant to Woodworking, so avoid using Woodworking-based attacks. The Kraken is also resistant to Blacksmithing, so avoid using Blacksmithing-based attacks. The Kraken is also resistant to Leatherworking, so avoid using Leatherworking-based attacks. The Kraken is also resistant to Tailoring, so avoid using Tailoring-based attacks. The Kraken is also resistant to Hairdressing, so avoid using Hairdressing-based attacks. The Kraken is also resistant to Barbering, so avoid using Barbering-based attacks. The Kraken is also resistant to Farming, so avoid using Farming-based attacks. The Kraken is also resistant to Gardening, so avoid using Gardening-based attacks. The Kraken is also resistant to Hunting, so avoid using Hunting-based attacks.

The Kraken is a powerful enemy, and using the right combat items is crucial. The Kraken is resistant to Fire, so avoid using Fire-based attacks. Instead, use Lightning-based attacks, as the Kraken is weak to them. The Kraken is also resistant to Water, so avoid using Water-based attacks. The Kraken is also resistant to Wind, so avoid using Wind-based attacks. The Kraken is also resistant to Earth, so avoid using Earth-based attacks. The Kraken is also resistant to Ice, so avoid using Ice-based attacks. The Kraken is also resistant to Poison, so avoid using Poison-based attacks. The Kraken is also resistant to Sleep, so avoid using Sleep-based attacks. The Kraken is also resistant to Confusion, so avoid using Confusion-based attacks. The Kraken is also resistant to Silence, so avoid using Silence-based attacks. The Kraken is also resistant to Invisible, so avoid using Invisible-based attacks. The Kraken is also resistant to Invisibility, so avoid using Invisibility-based attacks. The Kraken is also resistant to Paralysis, so avoid using Paralysis-based attacks. The Kraken is also resistant to Petrification, so avoid using Petrification-based attacks. The Kraken is also resistant to Curse, so avoid using Curse-based attacks. The Kraken is also resistant to Blessing, so avoid using Blessing-based attacks. The Kraken is also resistant to Holy, so avoid using Holy-based attacks. The Kraken is also resistant to Unholy, so avoid using Unholy-based attacks. The Kraken is also resistant to Death, so avoid using Death-based attacks. The Kraken is also resistant to Life, so avoid using Life-based attacks. The Kraken is also resistant to Summoning, so avoid using Summoning-based attacks. The Kraken is also resistant to Disenchanting, so avoid using Disenchanting-based attacks. The Kraken is also resistant to Enchanting, so avoid using Enchanting-based attacks. The Kraken is also resistant to Transmutation, so avoid using Transmutation-based attacks. The Kraken is also resistant to Alchemy, so avoid using Alchemy-based attacks. The Kraken is also resistant to Mining, so avoid using Mining-based attacks. The Kraken is also resistant to Woodworking, so avoid using Woodworking-based attacks. The Kraken is also resistant to Blacksmithing, so avoid using Blacksmithing-based attacks. The Kraken is also resistant to Leatherworking, so avoid using Leatherworking-based attacks. The Kraken is also resistant to Tailoring, so avoid using Tailoring-based attacks. The Kraken is also resistant to Hairdressing, so avoid using Hairdressing-based attacks. The Kraken is also resistant to Barbering, so avoid using Barbering-based attacks. The Kraken is also resistant to Farming, so avoid using Farming-based attacks. The Kraken is also resistant to Gardening, so avoid using Gardening-based attacks. The Kraken is also resistant to Hunting, so avoid using Hunting-based attacks.

Water Fiend 3—Sunken Shrine, 1F

The Sunken Shrine's final floor is completely devoid of treasure, so don't stray from the direct path. First, proceed in a westerly direction from the stairs. Go north when the path dead-ends, go west across a short bridge, then south through a narrow corridor. This path leads around a corner to a door. Go through the door, pass three pools of water, turn to the west, and exit the room via the south door in a small alcove. Follow the corridor around and up to another door; this one leads to the Water Fiend's lair. Heal your party before tackling the Fiend of Water. If any character is using a Flame Sword, swap it out as Kraken is resistant to Fire.

KRAKEN

Kraken's defense is so high that your best fighters will barely cause double-digit damage, so power them up as soon as possible. Have your Black Wizards cast Haste and let the Warriors use Giant's Gloves. Do this for each member of the offensive line, turn by turn, and they will soon cause a decent amount of damage.

HP	ATK	DEF
1800	50	60
MDEF	GIL	EXP
160	5000	4245
WEAK		
Lightning		

Kraken's attacks are all physical (his Ink attack can blind the party, an effect that you can ignore), so Protera and/or Invisira are fantastic during this fight. Have White or Red Wizards cast them a few times in the first few turns to erase the threat of an instant kill by damage. Kraken is vulnerable to Lightning, so let your Black Wizards hit him with Thundaga. Have any idle party members chip away at him by using the Gauntlets.

Lifspring Grotto Available

Defeating the Kraken opens the portal to Lifspring Grotto, a bonus dungeon covered later in this guide.

THE WIND CRYSTAL

LUFENIA

Shop Data

White Magic, Level 8

SPELL	COST	CLASS
Full-Life	40,000 gil	

Black Magic, Level 8

SPELL	COST	CLASS
Flare	40,000 gil	

SHOPPING RECOMMENDATIONS

Lufenia has no armament shops, Inns, or Sanctuaries but there is a small, somewhat hidden magic shop. To find it, exit the town through the break in the outer wall in the northeast and go east. The shop sells what are arguably the game's two best magic spells: the attack spell Flare and Full-Life, which revives a character at their max HP. What are you waiting for? Buy them!

Objectives

1. Take the Rosetta Stone to Dr. Unne in Melmond.
2. Acquire the Chime from a Lufenian elder.
3. Travel to the Mirage Tower.
4. Fight the Blue Dragon on the third floor.
5. Use the Warp Cube to reach the Flying Fortress.
6. Battle Tiamat on the top floor of the fortress.

Lufenia Area Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Allosaurus	480	65	10	200	—	502	3387
Baretta	256	60	38	130	—	300	1428
Desert Baretta	352	98	48	156	—	1	2610
Hill Gigas	240	38	12	120	—	879	879
Minotaur	224	40	14	116	Fire, Dia	1050	1050
Zombie							
Troll	184	24	12	100	Fire	621	621
Tyrannosaur	600	115	10	200	—	600	7200
Winter Wolf	92	25	0	55	Fire	200	402
Wyvern	212	30	12	115	—	50	1173
Tarantula	64	5	12	46	—	50	141

Expect a half dozen or so encounters along the way, including Hill Gigas (in packs of three or four), Baretas, Wyverns, and two dangerous new enemies—Allosaurus and Tyrannosaur. The fairly common Allosaurus has an attack power of 65, 480 HP, and extremely durable magic resistance. Fortunately, they have weak physical defense.

Tyrannosaurs appear on rare occasions. When one appears, prepare for a difficult fight. Their tremendous attack is capable of leveling a weak character in one hit. If you encounter one, protect your healer at all costs.

Meet Dr. Unne in Melmond

After conquering the Sunken Shrine, make a quick detour to Melmond. Go to the northeast corner of town and show the **Rosetta Stone** to Dr. Unne (look for him near the gravestones). Moments later, he cracks the code of the Lufenian language and teaches your party how to speak it fluently.

The Long Walk to Lufenia

Sadly, this linguistic breakthrough probably won't be a boon to Lufenia's tourism industry, since the city is still mired in the middle of nowhere. To get there, fly northwest from Melmond (loop around the globe) and land at the top of the long peninsula on the west side of the northeast continent. From there, it's a long walk south to the city of Lufenia.

Acquire the Lufenia Chime

Aside from buying the last two level 8 spells, the only objective here is to get the **Chime** that opens the Mirage Tower. To get it, talk to the man in the southwest corner of the dock-like area to the east of the entrance.

Items Found

Chime

MIRAGE TOWER

Enemies

Wyvern	212	30	12	115	—	50	1173

Mirage Tower Encounters

The Mirage Tower introduces a few new enemies. Guardians, which appear in large quantities, are somewhat difficult to defeat. They're vulnerable to Thunder spells and they lack an offensive punch, but their high defense score and their paralysis attacks can drag out battles. Another new enemy is the Black Knight, an all-around solid foe with no particular strengths or weaknesses.

Hardy, flame-spewing Chimeras are vulnerable to Ice, but they're not much of a threat. The more dangerous foes are the Blue Dragons, which have the highest attack scores in the tower. They also possess a nasty Lightning attack that hits the entire party. They have no weaknesses and are highly magic resistant, so stick to physical attacks to cut through their HP.

Vampires make their triumphant return here (last seen as a boss in the Cavern of Earth). Exploit their Undead weaknesses (Dia and Fire) to destroy them as quickly as possible.

Bring along a few extra Cottages and learn Exit since the Mirage Tower is the first of several tough dungeons. When you're ready, park the Airship on the strip of grass southeast of the desert and head to the tower.

It's a short walk, so don't expect more than a few encounters. The enemies are the same ones encountered outside of Lufenia, with the addition of the desert dwelling Sand Worm. Defeat this rare foe quickly, since it can cast an instant-death Earthquake spell.

Mirage Tower, 1F

The staircase to the next floor is only a few steps away from the entrance. Go through the door, take a few steps to the east, and pass through the other door. On this first foray into the Mirage Tower, make sure you focus on looting the chests. The treasures in the middle include the **Healing Helm** (cast Heal in combat), the **Vorpal Sword** (a sword with no apparent ability), and the **Aegis Shield** (protects Knights from being turned to Stone).

Items Found

Aegis Shield	Dragon Mail	Sun Blade	Thor's Hammer
Cottage	Healing Helm	Tent	Vorpai Sword

Mirage Tower, 2F

Reaching the exit of the second floor is a much longer process and the loot is even deeper inside. Take the long route around the sides and turn left at the break in the wall. Turn at the break in the next wall and continue east to reach the center of the tower. From there, take the stairs to the next floor, or go south to find the central room's door. The loot includes a **Cottage**, the **Sun Blade** (a sword that causes extra damage to Undead), **Thor's Hammer** (casts Thundara), and the Knight-exclusive **Dragon Armor** (raises the Knight's magic resistance against all elemental attacks), as well as a bunch of gil.

You may want to Exit out after the looting is done and use a Cottage. Afterward, re-enter the area and quickly return to the third floor with a fresh party.

Mirage Tower, 3F

BLUE DRAGON

Go south to find to the entrance to the central room and prepare for a Blue Dragon encounter spot on the other side of the doorway. Have your Black and Red Wizards support the offensive line by casting Haste on the fighters, since their elemental spells will not be effective.

HP	ATK	DEF	MDEF
454	92	20	200
GIL	2000		
EXP	3274		
WEAK	-		

With the Warp Cube in your inventory, step on the central warp spot to go to the Flying Fortress, where five more grueling floors await.

Stone Golem	200	70	16	110	—	1000	2385
Vampire Lord	300	90	28	84	Fire, Dia	3000	2385

There are deadly new foes in the Flying Fortress. These battles test your endurance more than your wit, as few of these foes have any glaring weaknesses.

You'll encounter the Rakshasa and Dark Warrior foes, which don't have a lot of HP but are very resistant to magic. Rakshasas are poisonous and Dark Warriors can cast nasty spells like Doom and Flare.

There are plenty of other nasty spellcasters lurking about, including the Mindflayer and the Evil Eye. Both of these foes are capable of instant-kill attacks. The classic Medusa is also in the Flying Fortress as the slightly more powerful Earth Medusa. Fortunately, all three are weak on defense and go down quickly. Other new Magician-type foes include the Spirit Naga (weak on offense and defense), which can inflict virtually any status effect in the game.

The Soldier (400 HP) resembles a powerful Guardian, but he has a much higher attack score. He's weak against Thunder, though, making him one of only two new foes in the Flying Fortress who are vulnerable to anything. The other foe weak to Thunder is the deadly Vampire Lord. The Air Elemental is vulnerable only to physical attacks.

Manticores and the river dwelling Neochus are both capable of inflicting poison. Stone Golems are just powered-up Clay Golems with only 200 HP, but they're almost completely immune to magic.

No overview of the Flying Fortress is complete without a mention of the Warmech, a very rare random encounter that rivals the game's final boss in difficulty.

The Flying Fortress

There is no opportunity to save or heal between dungeons. If you're a conservative player, use the smash-and-grab technique: grab the treasure on the first three floors, warp out, drop a Cottage, and go through it all again (including the Mirage Tower). Alternately, stock up on Ethers to restore MP as it runs low.

Flying Fortress, 1F

This is a simple floor consisting of four rooms. The party starts in the middle with treasure rooms to the west, east, and south. You can skip the room to the west, since it contains only a **Potion** and some gil. The room to the east contains a **Protect Ring**, another **Healing Helm**, and more gil. That leaves the room to the south, which contains a single treasure—the **Razer**—that can cast Scourge. It's possible to achieve a few surprise kills with this weapon if you have an idle party member use its ability frequently. After looting the treasure chests, head north to the teleportation mirror and advance to the next floor.

Flying Fortress, 2F

The exit is a straight shot south from where you enter this floor, but don't ignore the six treasure rooms. The northwest room contains a **Mythril Helm** and a **Cottage**, while the west room contains only gil.

The southwest room

contains a real treasure: the **Adamantite** sought by the Dwarves. If your party has a **Warrior** or **Knight**, don't miss that chest!

On the east side, there are **Diamond Gloves** in the northeast and another **Ribbon** and a **Diamond Shield** in the east room. The **Black Robe** and **White Robe** are in the southeast room. These pieces are really no better than the **Ruby Armlet** your Wizards are probably already wearing. When used in combat, though, you can use them to cast **Blizzara** and **Invisira**, respectively.

Flying Fortress, 3F

The warp leads to an area near a circular window set into the floor. Approach it and take a peek for a clue as to the next destination. The warp to the next floor is to the west and a bit south of the one that lead in, just below the east treasure room.

There are treasure rooms to the east, north, and west. A long passage to the south contains a few rooms with a confusing clue that you'd be wise to skip. The treasure room to the north contains a **Potion**, **Protect Ring**, and some gil.

There are nice finds in the east and west rooms. The highlight of the west room is **Sasuke's Blade**, a Ninja-exclusive weapon with great stats but no special abilities. An item of note in the east room is the **Protect Cloak**, which is the only shield item in the game that you can equip on a **Black** or **White Wizard**.

That's it for treasures in the Flying Fortress, so if you're going to bail out and use a **Cottage**, do it now. If you do so, hop back into the **Airship** and take the **Adamantite** to the Dwarves so a powerful weapon is available for use against **Tiamat**.

Flying Fortress, 4F

This floor is an infinite loop, meaning you could walk in any direction forever. To get to the next floor from the warp mirror, head past two pits to the north, then turn west to find the warp after passing two more pits. You can also get there by going south past two pits, then turning east past two pits.

Flying Fortress 5F

Save your game now! Sure, there's a bit of a walk to reach Tiamat, but there is a chance that you may encounter a rare enemy known as the Warmech along the way.

WARMECH

This boss has 2000 HP, is resistant to all magic (except Holy), has an attack power of 128, and has a little attack called "Nuke" that does a few hundred points of damage to the entire party. If you see this foe, you may want to run before it unleashes its first attack.

HP	ATK	DEF	MDEF
2000	128	80	200
GIL			
32,000			
EXP			
32,000			
WEAK			
-			

If you'd rather fight this foe, use Haste and Saber on your fighters and set up a solid defense of NulAll and Protera. The Warmech regenerates 100 HP per turn, so if your enhanced fighters aren't inflicting more than that number, you have little hope of victory.

TIAMAT

The Fiend of Wind, Tiamat, may not measure up to the Warmech but she's no pushover. Her standard attacks cause less damage than Kraken's, but she has a number of nasty spells that damage the entire party (Poison Gas, Thunderbolt, Icestorm, and Flame).

Thunderbolt is the most common one, so NulShock is a good choice for White Wizards on your first turn. On subsequent turns, their job is keep everyone above 200 HP. Have your Black Wizards cast Haste on the Knights, let your Knights use Giant's Gloves, then start slashing! Tiamat is vulnerable to Poison and Stone (so a cheap Break victory is a possibility), while Holy and Flare are strong enough to punch through any magic resistance.

HP	ATK	DEF
2400	53	80
MDEF	GIL	EXP
200	6000	5496
WEAK		
Stone, Poison		

Whisperwind Cove Available

Defeating Tiamat unlocks the doorway to Whisperwind Cove. You can now explore the fourth bonus dungeon!

THE FINAL BATTLE

THE CHAOS SHRINE

Objectives

1

Have the Adamantite forged into Excalibur.

2

Use the Crystals at the Chaos Shrine.

3

Play the Lute on the Shrine's top floor.

4

Find and defeat Chaos and his four henchmen.

Chaos Shrine, 1F-3F Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Black Knight	260	44	38	135	-	1800	1263
Black Flan	156	49	255	85	Fire	900	1101
Chimera	300	30	20	130	Ice	2500	2064
Dark Fighter	200	40	38	186	-	3420	3420
Dark Wizard	105	26	40	170	-	1095	1095
Death Eye	360	120	60	160	Fire, Dia	1	1
Dragon	268	56	30	135	Fire, Dia	999	2331
Zombie							
Green Dragon	352	72	16	200	Ice	5000	4068
Ice Gigas	336	60	16	150	Fire	1752	1752
Purple Worm	448	65	10	200	Ice	1000	4344
Rhyos	350	40	18	143	Ice	5000	4584
Vampire Lord	300	90	28	84	Fire, Dia	3000	2385
White Dragon	200	53	8	196	Lightning, Fire	2000	1701
Winter Wolf	92	25	0	55	Fire	200	402

The Chaos Shrine's first floor is home to four enemies: Purple Worms, Chimeras, White Dragons, and Black Flans. Purple Worms provide more EXP than any other enemy in the Shrine. It's difficult to run from fights, but your fighters should be able to take them out while everyone else uses healing items and spells.

If a large group of White Dragons use Icestorm at the same time, fatalities may occur. If this happens, hit them hard and exploit their vulnerability to Fire and Lightning.

Black Flans are vulnerable to magic (in particular, Fire) and strong against physical attacks. Use combat items, especially the Mage's Staff, to defeat them. Chimeras and Rhyoses are both vulnerable to Ice (use the Black Robe to avoid wasting MP). The Rhyoses can petrify the entire party with a Poison Gas attack, so equip vital characters with Ribbons.

The second floor adds a number of old favorites, like the Ice Gigas, Dragon Zombie, and Vampire Lord. Hit the Dragon Zombies and Vampire Lords with the Mage's Staff and double Light Axes to inflict maximum damage.

The third floor adds Flying Fortress favorites like the Dark Wizard, Dark Fighter, and Black Knight. It also features the return of the Green Dragon, which was last seen in the Waterfall Cavern. The Green Dragon is vulnerable to Ice and unleashes dangerous, damage-dealing Poison Gas attacks.

Vampire	156	76	24	75	Fire, Dia	2000	1200
Vampire Lord	300	90	28	84	Fire, Dia	3000	2385

Each underground floor features enemies from one of the four Fiends' dungeons, with an enhanced version of that Fiend as the boss.

B1 has the Clay Golem, Stone Golem, and the Earth Elemental. Earth Elementals are vulnerable to Fire, but the Golems are only vulnerable to physical attacks. The rock theme is continued by the Earth Medusa and Basilisk, both of whom can petrify party members with their Gaze. If you have lots of Ribbons, these foes should no longer pose a real threat.

B2 is home to the Fire Gigas, Fire Lizard, Lava Worm, Fire Elementals, and Red Dragon. All but the rare Red Dragons are vulnerable to Ice (go Black Robe!), making this one of the easier floors to get through. Consider equipping a second-tier fighter with the Ice Brand, but switch back before fighting the boss.

Each enemy in B3 comes straight from the Sunken Shrine, but they're not so tough now that you have a few levels under your belt. Everything except the Water Elementals are vulnerable to Lightning (it's weak against Ice), so have your Wizards use Gauntlets and Thor's Hammer on every turn. Remember to take out White Sharks and Sahagin Princes quickly, as they're still the strongest foes in the sea.

The Flying Fortress foes that have made the journey to B4 are as strong as ever and appear in much larger groups. Outside of the Vampires and Dragon Zombies, nothing here has a significant magical weakness, so new foes like Doom Knights and Iron Golems must be dealt with using physical attacks. The Air Elementals are probably the most dangerous foes, so have Wizards use heal items every turn to keep HP up.

The Final Battle Draws Near

The game's last dungeon was also its first: the Chaos Shrine, northwest of Cornelia. Now that all four crystals have been activated, the large crystal in the center of Garland's room leads to a different area and a different time.

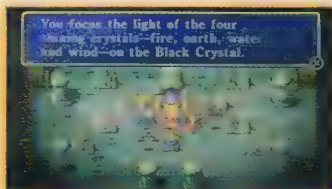

...But First, Excalibur!

First, go visit the Dwarves and have them forge the Adamantite into the powerful **Excalibur** for your Knight, if you didn't do so before facing Tiamat. Next, purchase any items and spells you couldn't afford earlier and pick up 99 Ethers for the trials ahead. If your spell casters are about to level up, pay a quick visit to the Lufenia area and get those new spells before you enter.

Forward Into the Past

Preparation is important here because a long and grueling dungeon lies ahead—2,000 years in the past! Enter the final dungeon by approaching and talking to the Black Crystal in the Chaos Shrine. Use the four crystals to open the portal to the past and step forward. You can return to the present by entering the black portal that marks the ground where you arrive in the ancient Chaos Shrine, or with the spells Teleport (if you're still on the first floor) or Exit (if you've ventured farther).

Clear the Bonus Dungeons

Defeating Chaos effectively ends the game. If you want 100% completion, take the time now to finish the bonus dungeons before heading into the Chaos Shrine.

Chaos Shrine, 1F & 2F

There are staircases in the four corners of this room, but you can only get to the ones in the southwest and southeast. The southwest staircase leads to a dead end, so that makes the choice pretty easy. The southeast staircase leads to a small area of 2F. Walk a few steps to the east and take another staircase up to 3F.

Chaos Shrine, 3F

Head south past the second room, then turn to the east and follow the pillars when they turn north to the central room's door. Just beyond the door is the Temple's first encounter point, a Death Eye. This foe is vulnerable to Dia and Fire spells and only has 360 HP. Its Gaze attacks can be fatal, so equip everyone with a Ribbon or Protect Ring before entering the room.

The Lute Opens the Path

The two chests here contain **Dry Ether** and an **Elixir**. Loot the chests and play the Lute provided earlier by the Princess. Playing the Lute reveals a ladder.

That ladder leads to the small room in the middle of 2F. Follow the path to the south, then west, then north to reach a new staircase. This staircase goes back to 1F and another short hike from the northeast corner to the northwest corner. This is where you'll find the stairs to the basement.

Walk all the way around this map (from the southwest corner, to the northwest corner, to the northeast corner, to the southeast corner) until a powerful Lich pops up looking for revenge. Save your game and heal to max HP before sending the party to the staircase guarded by Lich.

LICH

Lich has 2800 HP, so your spell-enhanced offensive line can take him down after only a few turns. Unfortunately, he tends to cast **Flare** on the first turn, so be ready to heal immediately. Don't burn through your stockpile of MP or Ethers just yet, as there's still a long way to go!

One Final Warning

The Lich is a powerful enemy, but it is not invincible. If you are strong enough, you can defeat it. However, it is recommended that you save your game before fighting it. Good luck!

Chaos Shrine, B2

There are only seven item chests in this dungeon and this floor has four of them. They contain a **Protect Ring**, **Protect Cloak**, **Sasuke's Blade**, and a **Megalixir**.

From the entrance, head west to get out into the open, then proceed north to find a door. Next, head east and then south to reach another door. This part of B2 is completely symmetrical; the stairs are right where they were on the left side.

If you want the items, stay away from the staircase where Marilith awaits. Instead, go south through the break in the wall. The **Protect Ring** and **Sasuke's Blade** are just through the door to the west, the **Protect Cloak** is through the door to the east, while the **Megalixir** is down a hallway to the east.

MARILITH

Marilith's new tricks are Firaga and Death, so equip Protect Rings and have a White or Red Wizard cast NulBlaze during the first turn. Confuse doesn't work on Marilith this time, so have the offensive line pull the typical Haste/Saber combo and start swinging.

Chaos Shrine, B3

If you want to skip most of this featureless level, head into the floor's west wing and go south as far as possible. Exit into the south-central courtyard and pass through a nearby door to the north. From there, go one room to the east (look for the gravestones) and then go south to the bottom edge of the map. Finally, head east to the staircase where Kraken awaits.

KRAKEN

Kraken has managed to shake his weakness against Lightning, so magic is no longer effective. He can cast a few weak spells (such as Thundara), but the real threat is his physical attacks. Use the White Robe and follow it up with Protera. As always, it is up to the offensive line to cut through Kraken's HP.

Chaos Shrine, B4

This level poses an interesting dilemma: head directly to Tiamat and the stairway down to the final level, or take the long detour that leads to the Masamune, a very powerful weapon.

The quickest way to reach the Masamune is the simplest. Follow the west wall south, then east, and it eventually leads right to it. Any class can use the Masamune, so it's ideal for second-tier fighters like the Ninja (after all, the Knight should have Excalibur), or give it to a White Mage for some added physical damage and healing support!

Masamune obtained from the chest!

Return to the starting area, but heal your party before crossing the thin bridge that links the northwest and northeast corners of this map. It's there that Tiamat has laid her ambush, not by the staircase!

TIAMAT

Prepare well and don't be afraid to use a few high-level spells. Tiamat's attacks are primarily magical, so a NulAll spell cast on the healer should ensure the party's survival if things go wrong. Tiamat doesn't use any one elemental type exclusively, but Thunder is still the most common, so a NulShock won't hurt. Tiamat is no longer vulnerable to Stone, so beef up your party's fighters with Haste/Saber.

Chaos Shrine, B5

There are no encounters on this floor, so check to see if any characters are close to leveling up. If so, fight a few foes in B4 (don't bother with Tiamat again because the EXP she gives isn't worth the risk) so everyone is at their best for the boss. Save the game and prepare for the original game's final battle.

CHAOS

Chaos has 20,000 HP and has the ability to heal using Curaja (this happens randomly, so just take him down as quickly as possible and hope you get lucky). He has no

weakness, so any magic cast on him is a wasted effort. Sure, you can get a few points through with Flare or Holy, but there are better things you can do with your MP.

Cast Protera, NulBlaze, NulShock, and NulFrost as quickly as possible. Cast NulAll first on the designated healer and, if you have the luxury of time, cast it on everyone else. Have your Black Wizards cast Haste on the offensive line. Have each attacker use the Giant's Gloves, then begin their relentless assault. Don't worry about sparing the use of any items (specifically Megalixirs) for this fight.

Save your game after the credits roll. Having a game cleared save game gives you the opportunity to start a New Game with the bestiary already started. It also provides a new selection at the game's main menu.

EARTHGIFT SHRINE

World Map

World Map

Earthgift Shrine Encounters

NAME	HP	ATK	DEF	MDEF	WEAK	GIL	EXP
Abyss Worm	2500	95	30	200	--	1500	4000
Black Goblin	50	10	4	16	--	300	200
Catoblepas	200	30	20	100	--	800	1500
Desertpede	120	35	15	85	--	100	250
Gloom Widow	71	8	20	40	--	520	140
Skuldier	120	25	6	42	Fire, Dia	80	133
Wild Nakk	80	15	20	30	---	60	240

The Earthgift Shrine has five randomly encountered levels and four new bosses. Once the party takes its first step into the shrine's entrance, you must defeat a boss or perish in battle to exit. The bosses are approximately equal in strength compared to the second wave of fiends from the Temple of Chaos.

Bonus Dungeons

Each trip through the dungeon yields a single boss battle—the doors lock behind the party after defeating a boss—so keep track of which ones you have already defeated. The good news is almost all of the chests respawn (with different items!) for each trip through the bonus dungeons, so each trip should provide new rewards.

Most of the encounters in the Earthgift Shrine are random encounters, except on the purple forest level. On that level, interacting with the enemies on the map triggers a fight. Some of these enemies move, but you must defeat the stationary enemies to reach the exit. The fifth—and final—floor contains all four bosses.

TWO-HEADED DRAGON

The 2-Headed Dragon likes to strike physically, so Invisira and Protera are good opening round spells. Also, try to use Haste and the Giant's Gloves on a character who can inflict big melee damage. The 2-Headed Dragon drops a unique item, the **Bard's Tunic**.

Wild Nakk	80	15	20	30	--	60	240
Yellow Ogre	150	25	15	60	--	250	300

Plan on taking two trips through the 10 random levels of Hellfire Chasm. Two maps contain two boss encounters (always Level 5 and Level 10). Each time you can choose to face one boss on each map. There are multiple instances of molten floors that damage the party while they are submerged.

On the rocky maps with no lava, each step on the glinting parts of the floor produces an enemy encounter. Unless you're hunting for levels or gil, avoid these areas!

The World in Triplicate

At some point during a trip into Hellfire Chasm, the party appears on one of three different maps that resemble the game's World Map. The key to advancing past these maps is to discover the location of the Airship and use it to reach the exit. Don't hurry to the next level until you've scoured the area for treasure chests.

CAGNAZZO

Cagnazzo is a glass cannon with low defense but powerful spells that can take out party members in a hurry. Exploit his low defense and pound him with Saber- and Haste-enhanced melee attacks. Don't give him too many opportunities to unleash Tsunami!

Yellow Dragon	500	50	16	200	--	3000	2400

The entrance to Lifespring Grotto is a whirlpool near the canal created by the dwarves. The only way to enter this area is to use the ship. One of the random levels requires the use of the Canoe; in fact, the party spends the entire level paddling around in the Canoe! Another map's floor is covered with ice shards, which deal damage to the party with every step.

Two of this game's most powerful bosses—Omega and Shinryu—are at the end of Lifespring Grotto. You can only fight one of them per trip (they're on the same level), so plan on at least two visits to Lifespring Grotto. Before embarking on a trip, pick up Tonics from the Desert Caravan to use during the battles and load up on Ethers so the party is at full HP and MP before either encounter.

Dark Bahamut's Dragon Challenge

When you encounter Dark Bahamut, he issues a challenge: defeat a specific number of dragons to pass his trial. You will have fought most of the dragons at this point in the game. The Holy Dragon is the most powerful foe, so don't take it lightly.

A Dance with Density

While there are five total maps filled with dancers in Lifespring Grotto, you will only see three of them during a visit. The first map is static, but there are two choices for the next two locations.

The challenge is moving through the throngs of dancers. Just move in the same direction as the dancers and try to pick up any random chests that appear before moving to the next map.

Seahold and Gilgamesh

The fifth basement of Lifespring Grotto is always the village of Seahold. Speak with the mermaids to determine the location of Gilgamesh. He appears in one of three locations (see map callouts).

GILGAMESH

Gilgamesh has a few tricks up his sleeve, including Protect, Wind Slash, and Excalipur. However, his fast melee attacks can bring down a single character in a flash.

Use Invisira and Protera to mitigate the damage, then take him down with powerful melee attacks. Gilgamesh drops **Genji Gloves** after the fight.

HP	ATK	DEF	MDEF

GIL	0		
EXP	0		
WEAK	-		

Lifespring Grotto Boss Encounters

Before fighting the enemies on B20, Omega and Shinryu, make sure your party is at least level 50 (assuming the party includes a White Wizard). Even at level 50, you should save your progress before fighting either foe.

If your party isn't level 50 (if you have a party without a White Wizard, then wait at least 10 more levels and pick up the Sage Staff from Orthos in Whisperwind Cove), then return to the surface through the warp points on B5 or B10 after defeating Gilgamesh or Atomos.

OMEGA

Settle in for a long fight because Omega's defense is incredible. Protera and Invisira help against Omega's single-target blasts, but there's no real defense against Wave Cannon.

Use Healaga every turn if it's available (use the Rune Staff if Healaga isn't an option), and feel free to burn a Megalixir if things get tense. Lightning-based spells inflict decent damage, and let your Knights use some enhanced melee attacks. Until your characters reach level 80 or so, this battle will be a grind. Be patient and you will claim **Mursame** at the end of the fight.

The Path Vanishes!

This map consists of a giant castle with rooms that are connected by a fading walkway. Many paths lead nowhere, so study the map to determine which side paths you should avoid.

ATOMOS

B10 means an encounter with Atomos, who holds one of the best items in the game—the **Judgment Staff**. Atomos is a formidable opponent who uses Firaga and Comet to damage the entire party, or Wormhole to knock out one character instantly! Use Saber and Haste early in the fight, then dedicate one character to healing the entire party each turn with either spells or items.

HP	ATK	DEF	MDEF
13,000	50	70	200
GIL	0		
EXP	0		
WEAK	-		

SHINRYU

Use Protera immediately and consider multiple applications of Invisira to counteract Shinryu's unbelievable 220 attack power.

Fortunately, Shinryu's physical defense is relatively low, so pass around Haste and Giant's Gloves to the melee-based characters in the party. You may want to use two characters to attack while the other two heal every turn. Just as with Omega, defeating Shinryu won't happen quickly so don't give up if the fight continues to drag on. Keep in mind that the prize at the end is the mighty sword **Ragnarok**!

The good news about Whisperwind Cove is that, unlike the other bonus dungeons, you can face all four bosses during a single trip. The bad news is that Whisperwind Cove contains 40 levels! The levels are encountered randomly, save the final level that always contains the encounter with Death Gaze.

Dwarven Barter System

To continue past this level, you must obtain a star ruby and give it to the giant blocking the path. To accomplish this task, speak with the dwarves around the level and make note of which item each one desires. One dwarf has the item that starts the chain of events (it's randomly determined), so when you have that it's a matter of speaking with the next dwarf in the chain to advance. The final dwarf hands over the star ruby.

Bonus Dungeons

EXIT

EXIT

EXIT

EXIT

Beaver Herder

Speak with the lone man amongst the throng of giant beavers. He asks for a certain number of beavers to be moved to each side of the room. Upon doing this, he opens the portal to the next map.

Hotfoot

These two maps are almost entirely covered with lava. To restore the party's HP, walk around the stony areas to start a battle and use the Healing Staff and Healing Helm to conserve MP. Of course, with enough Ethers in your inventory, MP conservation isn't as much of a priority.

Shopping Destinations

There are two maps that offer both shops and Inns to restore the party's HP and MP. The Inns are pricey at 1000 gil, but gil is likely not a concern at this point. There are items for sale in these towns that are otherwise typically difficult to obtain or are available one time only in a chest or from defeating a boss. The mages have a static inventory, offering all levels of both types of magic as well as item, weapon, and armor shops.

Mage Town Shop Data

Faerie Town

The town is full of faeries. Some of them are helpful (restoring the party's HP and MP), while others drain the party's MP entirely and leave everyone's HP at 1! If the entire party is close enough to full health (there are still random encounters on this map), then don't speak to any of the faeries except the one nearest the exit, who opens the path to the stairs.

Spare Parts

Speak with the lone functioning robot (the silver one), then search through the pieces scattered around the area until two parts (the parts and their locations are random) are discovered. Return to the original robot, who reveals the exit from this map.

New Place, Old Enemies

Speak with the creatures wandering around to start a fight. These fights are manageable at this point in the game, but you must clear out the inhabitants to open the stairway.

Whisperwind Cove

Hide-and-Seek

When you encounter a child who is playing hide-and-seek, you must help find the final kid who is proving elusive. This red-headed master of hiding is in the center of town in one of three locations. Use the information on where the various doors lead to find the rascal, then return to the first child who reveals the way to the exit.

WARP BY NUMBER								
1 → 20	8 → 7	15 → 21						
2 → 14	9 → 5	16 → 19						
3 → 11	10 → 20	17 → 20

5 → 9	12 → 3	19 → 4						
6 → 15	13 → 16	20 → 10						
7 → 8	14 → 6	21 → 13						

TYPHON

Typhon's vulnerability to Ice opens up opportunities for Black and Red Wizards, but don't deviate from the enhanced melee attacking that works so well against every boss. The reward for defeating Typhon is the Genji Helm.

Ice			

ORTHROS

Don't bother with any magical attacks against Orthros. With a 40 Defense, he's not the easiest target for melee attacks. He uses Ink during battle, but most parties should already be safe from status effects.

The **Rune Staff** dropped by Orthros is a big step up from the Healing Staff, especially if you're playing without a White Wizard in your party.

LABYRINTH OF TIME

The Labyrinth of Time is comprised of 30 floors filled with challenging puzzles, capped off with an intense boss battle. In any given run through the Labyrinth of Time, you must clear seven to 10 floors (the party always starts in a Modern Maze). In addition, the boss at the end changes depending on your performance in solving the puzzles. The Save feature is disabled in the Labyrinth of Time, as are any spells and items that transport the party out of the dungeon.

To gain access to the Labyrinth of Time, you must have completed the main story up to the point where you're ready to go back in time to fight Chaos. Talk to the cloaked figure in Cornelia, and it will leave town through the south exit. Next, follow the cloaked figure to the back of the Chaos Shrine and examine the miasma emanating from the back wall to open a doorway. Walk into the column of light after listening to what the cloaked figure has to say.

Each level within the labyrinth begins with the Light of Time providing a list of abilities to sacrifice and the amount of time gained through the sacrifice. If you are so inclined, you may choose to sacrifice fewer abilities than the number given and have less time to complete a floor. Each floor is then activated by examining the stone tablet located somewhere on that floor. It's usually near the entrance, but not always, so look carefully. Time will continue to count down even while you're looking for the tablet, so find it as quickly as possible.

Enemy Encounters

The enemies that patrol the Labyrinth of Time are the same ones you've encountered throughout the bonus dungeons. The only new enemy is Chronodia, who awaits in the Space in Time.

Complete the level's challenge with time remaining to break the blue seal. It's still possible to complete the floor's challenge after time expires, but the party loses HP and MP for every second after and enemy encounters occur more often. Completing a challenge after time has expired breaks the red seal.

Blue vs. Red

Abilities for Time

The following is the complete list of abilities that may be sacrificed.

No Fight command	On the Battle screen, Fight is unavailable as a course of action.
No Magic command	Only one of the No Magic/White Magic/Black Magic options can be sacrificed at a time. Magic becomes unavailable as a choice on the dungeon map and the Battle screen if Magic is sacrificed. Sacrificing White or Black Magic leaves Magic as an option, but the spells of the selected color are grayed out.
No White Magic command	
No Black Magic command	
No Item command	Only one of the No Item/recovery items/attack items options can be sacrificed at a time. Sacrificing the Items command means no items are available for use. Recovery items are the items that restore health or remove status effects. Attack items are the items usable only in combat (such as Fangs). Equippable items that are used to produce an effect aren't part of either list, so you lose their use only if the Item command option is sacrificed.
No recovery items	
No attack items	
No Flee command	The party cannot run from a battle once it begins.
No Dash ability	The party moves at a walking speed at all times.
Attack halved	Each character's Attack score is reduced.
Defense halved	Each character's Defense score is reduced.
Accuracy halved	Each character's Accuracy is reduced.
Evasion halved	Each character's Evasion is reduced.
Intelligence halved	Each character's Intelligence is reduced.

Breaking Blue Seals

If your goal is to complete the challenges within the time limit, then keep the following in mind:

- ♦ **DON'T GIVE UP DASH:** You're racing the clock; walking speed is not an option.
- ♦ **DON'T GIVE UP FLEE AND DON'T STOP TO FIGHT:** Battles waste time, so skip them when possible. Time continues to count down during battles.
- ♦ **IF YOU DON'T NEED TO FIGHT, GIVE UP OFFENSE:** If you need time, drop offensive (Attack, Accuracy, and Intelligence) stats. You can run away from fights, but characters might get KO'd in one shot if their Defense and Evasion are too low.
- ♦ **SET THE CURSOR TO MEMORY:** If you're forced to fight, save time by having your selections carry over between rounds.
- ♦ **MAGIC IS EXPENDABLE WITH THE RIGHT ITEMS:** With the Healing Staff and Healing Helms, Judgment Staff, Lightbringer and the like available, you don't need a Magic command.
- ♦ **REVISIT THE LIGHT OF TIME AFTER TIME EXPIRES:** Buy a bit more time by giving up additional abilities.

Inner Sanctum

An Inner Sanctum is a rest area that appears randomly during a trip through the Labyrinth of Time. The pots on the floor restore the party's HP and MP. The blue column of light leads to the next level, while the red column of light serves as an exit to the start of the Labyrinth. This is the only way to exit the Labyrinth (short of defeating the final boss) and save any progress you've made.

MODERN MAZE

1. Faerie's Frolic

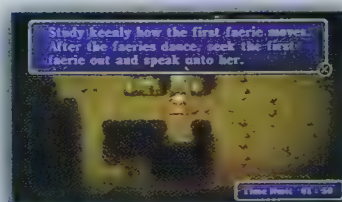

SACRIFICE LIST— PICK 1

No Magic command

No Item command

No Flee command

Watch the first faerie's movement closely. You must find this specific faerie from a group of five based solely on how it moves. Picking the wrong faerie results in the quintet retreating, changing positions, and returning. You lose nothing for an incorrect selection except the time it takes for the faeries to shuffle around off-screen.

2. Faerie's Farce

SACRIFICE LIST— PICK 1

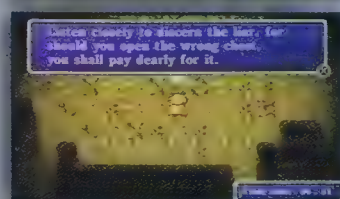

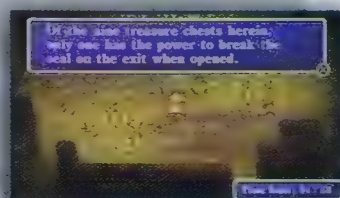

No Fight command

No Magic command

No Flee command

No Dash ability

There are nine chests but only one chest contains the key to break the seal. The seven faeries in this area provide hints; all but one of them are telling the truth.

The easiest way to discern the one not telling the truth is to speak with all the faeries. There should be at least one who contradicts what two others have said. Piece together the remaining clues, open the correct chest, and the party is ready to continue. If you select the wrong chest, the remaining time is cut in half.

3. Neat and Tidy

The goal is to push the stones into the open spots in the north wall. Any stone that is moved and touches a robot is destroyed. Speaking with a robot at any time resets the stones that have been destroyed. Stones that have been correctly placed will remain where they are.

You can complete this maze fairly quickly, so don't go overboard and drop abilities for the sake of time. Minimize the east and west movement of the stones while pushing them northward. Doing so means another stone will make a longer trip before being placed. Longer trips increase the chance of touching the wandering robots and a greater chance that you must reset the puzzle.

SACRIFICE LIST— PICK 7

- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No attack items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

MEDIEVAL DUNGEON

4. The Guardian

The key that unlocks the exit is hidden in one of three chests scattered in the area. The dragons act as security guards, moving in different directions and occasionally at different speeds. The dragons move in somewhat predictable patterns, but there is some variance in their timing.

You don't have to touch a dragon for them to detect the party. As long as the dragon is facing the proper direction and is within three paces, the dragon will find the party. If your party gets discovered, they are returned to the starting point and the dragons' positions are reset. Try to memorize the dragons' paths and scurry past them when their backs are turned.

SACRIFICE LIST— PICK 1

- No Fight command
- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No attack items
- No Dash ability

5. Path of Light

SACRIFICE LIST— PICK 2

- No Magic command
- No Item command
- No Flee command
- No Dash ability

Watch the ball of light travel around the area and follow its path. If you take the wrong path at any point, the light re-appears and shows the correct path again. The path changes if you reset the puzzle, so pay attention each time the light makes its circuit.

6. Labyrinth of Darkness

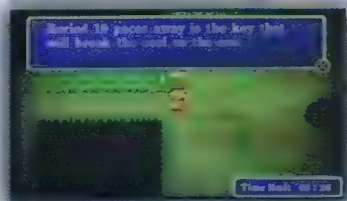

SACRIFICE LIST— PICK 2

- No Fight command
- No Magic command
- No Flee command
- No Dash ability

Light the candles to create a greater sphere of light. The chest never moves, so if you know where to find it, there's no real need to light the candles.

7. Scavenger Hunt

After the tablet provides the distance to the buried key, use individual taps on the controller to move since this allows you to count the number of steps taken. Turning off Dash may make counting your steps in this manner easier. If you dig in the wrong spot, there may be an enemy encounter and the game provides an updated distance to the key. Keep in mind that diagonal movement isn't allowed in *Final Fantasy*, so one square away diagonally is actually two steps.

SACRIFICE LIST— PICK 3

- No White Magic command
- No Item command
- No recovery items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Intelligence halved

8. March of Souls

Speak with the cloaked figure to start a parade of 10 characters encountered previously in *Final Fantasy*. The cloaked figure asks three multiple-choice questions that you must answer correctly. If you miss any, the cycle starts over with a new set of characters marching between the balls of fire.

Unless you have a terrific memory, take some notes (a pen and paper works well here) and devise a shorthand system to note the order of the characters. With the information in front of you, answering the questions should be a breeze.

SACRIFICE LIST— PICK 3

- No White Magic command
- No Item command
- No recovery items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Intelligence halved

9. The Bat Cave

This is a counting exercise. Take note of the total number of bats, the number of stationary bats and the number of bats in motion. Answer the single question at the end to break the seal.

SACRIFICE LIST— PICK 7

- No Fight command
- No White Magic command
- No Item command
- No recovery items
- No attack items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

ANCIENT CATACOMB

10. Bat-a-bing!

SACRIFICE LIST— PICK 2

- No Fight command
- No Magic command
- No Flee command
- No Dash ability

The bats must go into the center area. Stand at the entrance to the area and use the bat's logic (turning right with a collision) to backtrack through the path the bats must follow to enter the center area.

If you don't want to break the blue seal, start at the top-center of the room and wait for the bats to veer away from the party. Take one step back and wait for their return and repeat this process. This trial-and-error method is excruciatingly slow, but you will find the solution eventually.

11. Trial by Fire

SACRIFICE LIST— PICK 3

- No Fight command
- No Magic command
- No Item command
- No Dash ability

Interacting with a candle switches the candles around it (above and below, left and right) from off to on, or on to off. The goal is to have all the candles lit at the same time.

There is a random number of candles burning when the challenge begins. The key to solving this puzzle is lighting the most candles with the fewest touches. The solution should not include switching an already lit candle off, then re-lighting it. If you're stuck with a single candle still unlit, leave the puzzle area and restart the puzzle.

12. Fire Drill

Read the tablets and light the appropriate candles in the four-by-four grid. The tablets provide clues as to which candles to light to break the seal.

Start off by reading the tablets to determine how many candles you must light. If any tablet says to light all of the candles, do so immediately. If any tablet indicates to light three consecutive candles, light the center pair immediately. Fire Drill becomes tricky when every tablet asks for you to light either alternating or a single candle. If this occurs, trial-and-error may be required to solve this puzzle.

SACRIFICE LIST— PICK 5

- No Fight command
- No Magic command
- No White Magic command
- No Black Magic command
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

13. Specter Inspector

Five specters appear on-screen, then walk off-screen. When they return, one of the five is a different character. Speak with that character to continue. The next set of specters is twice the size of the first group, but the challenge is the same.

The third group consists of only three specters, but they change the direction faced, not their appearance. The fourth group has five characters; however, the challenge is the same as the one for the previous group. The final challenge has 10 specters and the change could be either a slightly changed character model, or a specter has changed the way it faces. A wrong guess leads to a battle; after the battle, the specters re-appear and the process begins again.

SACRIFICE LIST— PICK 5

- No Fight command
- No Magic command
- No Item command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

Primeval Pit

PRIMEVAL PIT

14. Beat the Heat

Before undertaking this challenge, turn off Dash unless you have nimble fingers. The goal is to cross from one end of the path to the other while touching every sphere of light. The catch is that the stones crumble after crossing them. If the party falls into the lava, they are sent back to the starting point and all of the spheres reappear.

SACRIFICE LIST— PICK 5

- No Magic command
- No White Magic command
- No Item command
- No recovery items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

Ancient Catacomb

15. Thunder Alley

The goal is to open the chest in the center of the maze to break the seal. When the screen flashes, move closer to a lightning rod to avoid being swept back to the start. Just keep within one space (diagonal spaces are safe as well) of the lightning rod until the lightning strike passes. Stray too far from the lightning rod when a lightning bolt hits and you must start over at the tablet.

SACRIFICE LIST— PICK 6

- No Fight command
- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No attack items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

16. Mechanical Madness

Move the robots to clear the path to the other side of the room. The robots move in the direction opposite the side on which the character stands (keep this thought in mind). The robots' locations vary slightly each time the puzzle is started.

The key to completing this challenge is to look ahead before moving any robots. Push robots out of the way of the party's path and make sure they don't block movement of other robots. If a single push is all that's required to create a path, don't push the robot just because the path is clear to the wall! You can always return to move the robot again if it's necessary, but you can't undo any single movements. Thinking ahead is the quickest path to solving this puzzle.

SACRIFICE LIST— PICK 6

- No Fight command
- No Magic command
- No White Magic command
- No Black Magic command
- No recovery items
- No attack items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

17. Stone Trap

Trip the switches (the orange numbered callouts) in the order shown on the map.

SACRIFICE LIST— PICK 6

- No Fight command
- No Magic command
- No Black Magic command
- No Item command
- No attack items
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

- | | |
|--------------|--------------|
| 1 X-Potion | 5 Mind Plus |
| 2 Power Plus | 6 Speed Plus |
| 3 Dry Ether | 7 Elixir |
| 4 Cottage | 8 Potion |

18. Flower Sale

The cloaked figure hands over some gil and you must spend that exact amount by buying flowers from the merchants in the area. Keep a pencil and piece of paper handy to keep a running total of the amount of gil spent. Speak with a few merchants before buying anything to get an idea of what some are charging. After making a purchase from a vendor, that vendor vanishes. If you have spent too much or too little when you speak with the cloaked figure again, the challenge resets and you start with a different amount of gil.

SACRIFICE LIST— PICK 7

- No Magic command
- No Black Magic command
- No Item command
- No recovery items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

19. Breakout

Each floor switch controls one or more stones. Switching them off or on will make stones disappear or reappear, respectively. Some of the stones are not in the immediate area of the switch that controls them, so explore a bit if you don't see a stone vanish after stepping on a switch. Additionally, some stones are linked to more than one switch. The goal is to reach the bottom-center square and head through the exit.

SACRIFICE LIST— PICK 6

- No Fight command
- No Magic command
- No Black Magic command
- No Item command
- No attack items
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

20. Mirror-Image

Before starting this challenge, set Dash to off as even walking speed is faster than the robot you must mirror. Also, don't forget to mirror (not match) the robot's motion. There are four stages to this challenge and each stage requires one pattern of movement repeated four times. Don't move too far ahead or fall too far behind the robot! Fortunately, failing to move as indicated only resets the challenge back to the start of the current pattern.

SACRIFICE LIST— PICK 8

- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No attack items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

ORIGINAL CHAOS

21. Marching Orders

Move into the empty spot in the middle of the soldiers, then keep in step with them. Listen for the whistle to know when the formation is about to start moving. Note that the formation stops randomly and with no warning. The whistle sounds again when the formation is about to move.

Move too quickly, or straggle too far behind, and the formation comes to a halt. The sergeant in charge of the formation will then shout in frustration and the challenge repeats from the start. Turning off Dash will definitely help here.

SACRIFICE LIST— PICK 4

- No Magic command
- No White Magic command
- No Item command
- No recovery items
- No Dash ability
- Accuracy halved
- Intelligence halved

22. Twin Statues

There are four sets of statues that you must move and turn so they are adjacent to and facing each other. Pushing the statues makes them move in the same direction as the character faces. Statues always turn in a clockwise direction; reset brings back all the statues, so don't get stuck!

The key here is to avoid pushing a statue into a position where you can't move it. It's not a completely lost cause if this happens as long as you can push the other statue to reach it, but it does make things a bit more difficult.

SACRIFICE LIST— PICK 3

- No Fight command
- No Magic command
- No Flee command
- No Dash ability

23. Note for Note

SACRIFICE LIST— PICK 4

- No Fight command
- No Magic command
- No Item command
- No Dash ability
- Attack halved
- Defense halved

Watch the floor plates (or memorize the tones) and repeat the pattern. There are three memory tests and each successive test adds more notes to remember. Making a mistake means the pattern is repeated and you must try again, but otherwise no time is lost.

24. The Path to Peace

SACRIFICE LIST— PICK 4

- No Item command
- No Flee command
- Attack halved
- Accuracy halved
- Intelligence halved

You must clear a path for a robot to reach the light at the end of the maze. There are two objects that block the robot's path: Holy Dragons and stones. The stones must be moved and the dragons eliminated (it isn't necessary to fight the dragons; you could engage them and Flee from the battle). If the robot's path becomes blocked, it will shut down and return to its starting point. While the robot's path changes each time this challenge is started, it always follows the same path during the same challenge. Therefore, expect to restart this challenge at least once before completing it. There's no way to anticipate the robot's path, so you must learn through trial and error.

25. Slay or Be Slain

The cloaked figure asks you to kill a certain number of a specific type of dragon without harming any other types of dragons. There are three defining characteristics for the dragons: horns (0, 2 or 4 horns), wing size (large and small), and tail size (large and small). Carefully observe the dragons as they wander around. It's easiest to tell how many horns a dragon has when it faces south, while the tail and wing length are more apparent when it faces north.

There are three stages to this challenge. In each stage, the cloaked figure asks for an additional type of dragon (meaning one type in the first stage and three in the third). It's best to keep a tally of the dragons killed to avoid repeating the challenge. Failing at any point means starting over with the first set of dragons to kill.

SACRIFICE LIST— PICK 5

- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No attack items
- No Dash ability
- Attack halved
- Defense halved

26. Labyrinth of Totals

The first stage is to shut down the green forcefield. To reach the switch that controls the forcefield, you must move the robots to create a path. There are some switches and stones beyond the robots. The switches remove the stones, but the stones return after a brief time. Activate the switches in the order indicated on the map (1-7). Take the most direct route to reach the next switch.

SACRIFICE LIST— PICK 8

- No Magic command
- No White Magic command
- No Black Magic command
- No Item command
- No recovery items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

NETHERWORLD CRYPT

27. Labyrinth of Disasters

To break this map's seal, the party must reach the end of the maze. Use the candles scattered around the level to increase the visible area on-screen. When the screen flashes, move the party close to a lightning rod and walk around it until the lightning strike passes. If the party is caught away from a lightning rod when lightning strikes, they will return to the starting point.

SACRIFICE LIST— PICK 7

- No Fight command
- No White Magic command
- No attack items
- No Flee command
- No Dash ability
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

28. Step by Step

The exit is directly east of the entrance, but the room is filled with robots. For each step that the party takes, the robots take a step in a random direction. If a robot ends up in a square adjacent to the party, then a fight against a Warmech ensues. Reach the exit to break the seal.

SACRIFICE LIST— PICK 7

- No Fight command
- No White Magic command
- No recovery items
- No Flee command
- Attack halved
- Defense halved
- Accuracy halved
- Evasion halved
- Intelligence halved

29. Tricky Statues

This is a combination of Twin Statues and Step by Step. You must match up the identical statues while monsters move randomly in time with the party's steps. When a pair of statues is matched, both the statues and the enemies that resemble the statues vanish from the map. Match up all the statues to break the seal.

**SACRIFICE LIST—
PICK 7**

No Fight command
No White Magic command
No recovery items
No attack items
No Dash ability
Attack halved
Defense halved
Accuracy halved
Evasion halved
Intelligence halved

30. Traveling Salesman

Tablet

Watch the characters who pass, then speak with the cloaked figure. You receive an exact amount to spend (the amount changes) on purchasing flowers from the characters who just appeared. There are extra characters in the area as well (color swaps of the characters in the parade) who turn into Revenants if you speak with them. Check with all the characters before making any purchases. There are eight flowers to buy, however, the only way to reach the correct total is to buy from the correct seven.

**SACRIFICE LIST—
PICK 8**

No Magic command
No White Magic command
No Black Magic command
No Item command
No recovery items
No attack items
No Flee command
No Dash ability
Attack halved
Defense halved
Accuracy halved
Evasion halved
Intelligence halved

SPACE IN TIME

Space in Time is the final level of each succesful trip through the Labyrinth of Time. Chronodia, the architect of the Labyrinth, waits to challenge all those clever enough to navigate his challenges.

There are several versions of Chronodia. Breaking red or blue seals in a certain order will send you on different paths through the labyrinth, with a defferent version of Chronodia at the end of each. The more successful you are, the more powerful Chronodia will be. The following boss fight includes that version's information, but the strategy to defeat all versions is essentially the same. Each version drops a different (and incredibly powerful!) item, so there is a reward for facing each version of Chronodia.

CHRONODIA (#203)

Your party will likely gain many levels while travelling through the Labyrinth of Time. These levels come in handy when battling an enemy as powerful as Chronodia. Start off

HP	ATK	DEF	MDEF
42,000	120	190	200
GIL

with defensive spells such as Protera, Invisira (consider multiple applications of Invisira) and NulAll on the mage tasked with keeping party members alive. You can use other Nul spells here, as Chronodia has an extensive spellbook. Chronodia's most painful ability is called Seal, which locks out one menu option for a few rounds. The potential losses are Fight, Item and Magic. Fortunately, the current round's selections are not affected by Seal; the lockout begins with the next round of combat options.

Don't use any damage spells on Chronodia. Black Mages are better off using healing items than trying to crack Chronodia's impregnable magic defense. Use Giant Gloves, Haste, Temper, Saber, tonics, and anything else that improves a character's melee attack potential. If Chronodia knocks out anyone during the battle, remember to reapply all of the protective and offensive spells that he or she had active.

These fights will be challenging until your party reaches level 80. This isn't a stretch if you wish to unlock all the levels in the Time Chamber and face each version of Chronodia. Don't be shy with Megalixirs and Ethers during these bouts either.

BESTIARY

LEGEND

- 1** #: The enemy's reference number in the game's bestiary.
- 2** Name: The enemy's name.
- 3** HP: The enemy's total number of hit points.
- 4** Attack: This score determines the base strength of an enemy's physical attack.
- 5** Accuracy: This score determines the chance of an enemy's physical attack landing.
- 6** Defense: The enemy's resistance to damage dealt by physical attacks.
- 7** Agility: This score determines the order of action in battle.
- 8** Intelligence: This score determines the chance of an enemy's magic attack landing (e.g. Sleep or Bind) and the amount of damage or healing done by spells an enemy casts.
- 9** Evasion: This score determines the enemy's ability to dodge a physical attack. The higher the score, the more likely a character will miss with a physical attack against the enemy.
- 10** Magic Defense: The enemy's resistance to damage dealt by spells.
- 11** Gil: The amount of gil dropped by the enemy after it is defeated.
- 12** Exp: The amount of experience awarded for defeating the enemy.
- 13** Treasure: When defeated, the enemy may drop the item listed here.
- 14** Weakness: The types of magic to which the enemy is vulnerable.
- 15** Resistance: The types of magic that have little to no effect on the enemy.

SECRETS

15 PUZZLE

When you're on the ship, hold the X button and press the Circle button 23 times to access a sliding tile puzzle game called "15 Puzzle." The game tracks your best time and rewards you accordingly. You will receive two of the following items for top three finishes each time you complete it.

1st Place Finish: X-Potion

2nd Place Finish: Dry Ether, Elixir, Emergency Exit, Hermes' Shoes, Remedy, Turbo Ether

3rd Place Finish: Blue Curtain, Blue Fang, Cockatrice Claw, Red Curtain, Red Fang, Spider's Silk, Vampire Fang, White Curtain, White Fang

The following are the items you can win for completing the puzzle in a time that is greater than the time for the top three places. These items are given out one per win: Golden Needle, Antidote, Potion, 100 gil, Eye Drops, Phoenix Down, Echo Grass

ART GALLERY

There are 76 images to unlock in the art gallery. The higher your completion percentage, the more images you will unlock. To increase the game's completion percentage, empty every treasure chest, find all the enemies in the bestiary, and complete the bonus dungeons.

MUSIC PLAYER

Defeat Chaos and save your game to create a "Clear Data" file. This will unlock the Music Player in the Extras menu. The Music Player allows you to listen to the music you heard throughout the game. You only have to unlock the Music Player to access all of the available tracks.

TIME CHAMBER

Defeat Chronodia at least once and save your game to unlock this option in the Extras menu. This menu option enables you to return to any floors within the Labyrinth of Time that have had their blue seal broken. Press the Triangle button to read the rules for using the Time Chamber.

FINAL FANTASY® II OFFICIAL STRATEGY GUIDE

The ultimate resource for a classic adventure!

- **COMPLETE WALKTHROUGH**

Detailed tips and strategies to navigate every dungeon.

- **AREA MAPS**

Locate every key item and treasure chest in the game.

- **BOSS STRATEGY**

Proven strategies to defeat every boss.

- **ITEM & EQUIPMENT LISTINGS**

Comprehensive statistical information for every armor, weapon, and item.

Check out www.bradygames.com/bookstore, or visit your local retailer.
